Management of Energy Transfer LP (ET) will provide this presentation to analysts and/or investors at meetings to be held throughout February and March 2022. At the meetings, members of management may make statements about future events, outlook and expectations related to Panhandle Eastern Pipe Line Company, LP (PEPL), Sunoco LP (SUN), USA Compression Partners, LP (USAC), and ET (collectively, the Partnerships), and their subsidiaries and this presentation may contain statements about future events, outlook and expectations related to the Partnerships and their subsidiaries all of which statements are forward-looking statements. Any statement made by a member of management of the Partnerships at these meetings and any statement in this presentation that is not a historical fact will be deemed to be a forward-looking statement. These forward-looking statements rely on a number of assumptions concerning future events that members of management of the Partnerships believe to be reasonable, but these statements are subject to a number of risks, uncertainties and other factors, many of which are outside the control of the Partnerships. While the Partnerships believe that the assumptions concerning these future events are reasonable, we caution that there are inherent risks and uncertainties in predicting these future events that could cause the actual results, performance or achievements of the Partnerships and their subsidiaries to be materially different. These risks and uncertainties are discussed in more detail in the filings made by the Partnerships with the Securities and Exchange Commission, copies of which are available to the public. In addition to the risks and uncertainties disclosed in our SEC filings, the Partnership may have also been, or may in the future be, impacted by new or heightened risks related to the COVID-19 pandemic, and we cannot predict the length and ultimate impact of those risks. The Partnership has also been, and may in the future be, impacted by the winter storm in February 2021 and the resolution of related contingencies, including credit losses, disputed purchases and sales, litigation and/or potential legislative action. The Partnerships expressly disclaim any intention or obligation to revise or publicly update any forward-looking statements, whether as a result of new information, future events, or otherwise. This presentation includes certain forward looking non-GAAP financial measures as defined under SEC Regulation G, including estimated adjusted EBITDA. Due to the forward-looking nature of the aforementioned non-GAAP financial measures, management cannot reliably or reasonably predict certain of the necessary components of the most directly comparable forward-looking GAAP measures without unreasonable effort. Accordingly, we are unable to present a quantitative reconciliation of such forward-looking non-GAAP financial measures to their most directly comparable forward-looking GAAP financial measures. All references in this presentation to capacity of a pipeline, processing plant or storage facility relate to maximum capacity under normal operating conditions and with respect to pipeline transportation capacity, is subject to multiple factors (including natural gas injections and withdrawals at various delivery points along the pipeline and the utilization of compression) which may reduce the throughput capacity from specified capacity levels.
What’s New

Operational

- Construction of the final phase of the Mariner East Pipeline is complete, and commissioning is in progress
- During Q1’22, construction began on the Gulf Run Pipeline project and the project is expected to be complete by year-end
- NGL transportation and fractionation volumes reached new records during Q4’21
- In Q4’21, Cushing South Pipeline launched Phase II which would expand crude capacity to 120,000 Bbls/d
- In Oct'21 a new 3mm barrel high-rate storage well was added to Monte Belvieu storage facility increasing NGL storage to 53mm barrels
- Placed Permian Bridge project into service in Oct’21
- Exported ~26mm barrels of ethane from Nederland terminal for FY’21

Financials

- Adjusted EBITDA
  - FY’21: $13.0B – up 24% from FY’20
- Distributable Cash Flow (DCF)
  - FY’21: $8.2B – up 43% from FY’20
- Excess cash flow after distributions
  - FY’21: ~$6.4B
- FY’21 Capital Expenditures
  - Growth: $1.4B
  - Maintenance: $522mm
  - $6.3B reduction in existing long-term debt in FY’21¹

Strategic

- Closed Enable Midstream acquisition on December 2, 2021
  - $100mm+ operational/cost synergies expected
- Announced a potential new Permian Basin takeaway pipeline utilizing existing Energy Transfer assets along with a new build pipeline to connect Permian supply to markets along the gulf coast including Houston Ship Channel, Katy, Carthage and Henry Hub
- Ongoing discussions with Panama to study the feasibility of jointly developing NGL assets
- In Q4’21, released Corporate Responsibility Report highlighting achievements in safety, risk management and emissions reduction programs

¹ Excludes debt assumed in Enable acquisition

Strategic asset base well positioned for long-term success
Energy Transfer – A Truly Unique Franchise

Asset Overview
- Natural Gas
- Natural Gas Liquids (NGLs)
- Crude
- Refined Products
- Storage
- Fractionator
- Terminals
- Processing
- Treating

Major Terminals
- Marcus Hook Terminal
- Nederland Terminal
- Eagle Point Terminal
- Houston Terminal
- Cushing Terminal
- Midland Terminal
- Lake Charles Regas
## De-Risking ET

### Levered Balance Sheet
- **Significant debt reduction**
  - Reduced long-term debt by $6.3B in 2021

### Project Execution Risk
- **Delivering growth projects**
  - Construction of final phase of Mariner East pipeline complete, commissioning in progress
  - Bakken optimization now in-service

### Complex Company Structure
- **More simplified organization**
  - ETO roll-up and reduced overhead costs

### Economic Slowdown Impacts
- **Uniquely positioned for improving macros**
  - Assets in all major producing basins and connected to major markets, including export ports on gulf and east coasts

### M&A Uncertainty
- **Financially disciplined in M&A markets**
- Recently closed accretive and complementary ENBL acquisition

---

**Strong outlook with significant cash available for allocation**
2022 Outlook Supported by Strong Core Business

ET 2022E Adjusted EBITDA $11.8 - $12.2 billion

2021 to 2022 Adjusted EBITDA Drivers

+ Enable Acquisition
+ NGL pipeline and export activities
+ NGL / gas prices
  - Lower asset optimization
  - Rising costs
+ Organic Projects
  + Orbit Ethane Export Terminal
  + Nederland LPG Expansions
  + Mariner East Pipeline System/PA Access
  + Permian Bridge
  + Bakken optimization project

2022E Adjusted EBITDA Breakout

Pricing/spread assumptions based on current futures markets

1. Spread margin is pipeline basis, cross commodity and time spreads
2. Fee margins include transport and storage fees from affiliate customers at market rates
## Earnings Supported by Predominantly Fee-Based Contracts

### 2021 Full-Year Adjusted EBITDA by Segment

³Includes ET’s proportionate share of JV spend
⁴Adjusted EBITDA includes 100% of ET’s EBITDA related to non-wholly-owned subsidiaries

*Joint Ventures
¹Additional phases under construction
²Currently under construction
³Includes JV capital contributions
⁴Adjusted EBITDA includes 100% of ET’s EBITDA related to non-wholly-owned subsidiaries
Alternative Energy Group – Leveraging asset base and expertise to develop projects to reduce environmental footprint

Dual Drive Compressors - Established in 2012
- Patented technology that allows for switching between electric motors and natural gas engines to drive compressors, and offers the industry a more efficient compression system, helping reduce greenhouse gas emissions
- In 2021, this technology allowed ET to reduce Scope 1 CO2 emissions by more than 765,000 tons, a 53% improvement over 2019
- In June 2021, our patented Dual Drive Technologies natural gas compression system was awarded a GPA Midstream Environmental Excellence award for its impact on reducing CO2 emissions

Carbon Capture Utilization and Sequestration
- Currently pursuing projects related to G&P facilities, and evaluating opportunities to capture carbon from ET and third-party facilities in the Northeast and transport CO2 through existing underutilized ET pipelines near CO2 sources
- Provide cash flows to Energy Transfer with minimal capital requirements due to structures that allow monetization of federal tax credits

Renewable Energy Use
- Approximately 20% of the electrical energy ET purchases originates from a renewable energy source

Renewable Fuels
- Evaluating opportunities to transport renewable diesel and renewable natural gas
- Benefit from significant current asset footprint

Solar
- Entered into first-ever dedicated solar contract, which anchors a 28 megawatt solar facility (Maplewood 2) in West Texas
- Operate approximately 18,000 solar panel-powered metering stations across the country
- Entered into second renewable energy power purchase agreement for 120 megawatts of electricity from facility in NE Texas

Repurpose Existing Assets
- Evaluating repurposing extensive acreage in WV, VA, KY and ND to develop solar and wind projects
- Pursuing opportunities to utilize ET’s significant asset footprint for the transportation of renewable fuels, CO2 and other products

In 2021, Energy Transfer’s Dual Drive technology allowed ET to reduce direct CO2 emissions by more than 765,000 tons, which is an improvement of ~20% compared to 2020
Program Highlights

- Committed to pursuing a zero-incident culture
- Real-time tracking of EHS incidents focused on leading indicators
- Significant use of renewable energy in operations
- Five step risk reduction process for every EHS incident
- Compliance tracking and trending through a comprehensive Environmental Management System
- Support pipeline safety and environmental research through membership in the Pipeline Research Council International (PRCI) and the Intelligent Pipeline Integrity Program (iPIPE)
- Member API Environmental Partnership – Voluntary Methane Reduction Program

- ~$53.7 MM donated to charitable organizations between 2017 and 2020
- In 2020, 1000+ employees participated in socially distanced and virtual volunteer activities
- Comprehensive Stakeholder Engagement Program that promotes proactive outreach and respect for all people
- Mailed more than 2 million brochures to stakeholders along Energy Transfer pipelines in 2020
- Ongoing support and cooperation with Native American tribes
- Adopted America’s Natural Gas Transporters’ Commitment to Landowners
- On-going emergency response and public awareness outreach programs

- Oversight of EHS compliance and ESG initiatives by Independent BOD Audit Committee
- Compensation aligned with business strategies – performance based with retention focus
- Strong enforcement of integrity and compliance standards
- ET Deputy General Counsel serves as Chief Compliance Officer
- Quarterly compliance certifications from senior management
- Alignment of management/unitholders

Program Accomplishments

- Safety Incident Rate (TRIR) improved 34% from 2018 to 2020 – below industry average
- Established an Alternative Energy Group to explore renewable energy projects
- Approximately 20% of electrical energy purchased by ET on any given day originates from renewable energy sources – enough to power ~40,000 homes
- ESG Metrics reported through EIC/GPA ESG Reporting Template
- 765,000 ton reduction of Scope 1 CO2 emissions with ET patented Dual-drive compressors, a 53% improvement over 2019
- Ducks Unlimited partnership that provided $5MM for 1,300 acres of wetlands restoration
- Energy Transfer’s 4000+ operations personnel are trained and qualified in accordance with pipeline safety regulations and sustain over 52,000 individual qualifications

- 2021 Forbes America’s Best Large Employers
- 175 nonprofit organizations served in 2020 – local to our assets
- 536 Liaison Meetings in 2020 – engaged 19,155 stakeholders
- Ongoing Native American power agreements, easements, and scholarships
- Group SVP of Operations Services named one of 50 Most Powerful Women in Oil & Gas in 2020 by the National Diversity Council
- ~7,300 emergency responders trained through Energy Transfer Outreach Programs
- Received Texas Gas Association’s Transmission Workplace Safety Award in 2020
- In 2022, partnering with the Arbor Day Foundation to plant 25,000 trees

- Co-CEO Leadership and Management
- Increased transparency with redesigned and updated website
- Annual Senior Management compliance review
- Added resources to oversee and manage compliance
- Significant management ownership > 13% of units
- Website publication of GRI/SASB Index and EIC/GPA Midstream ESG Reporting Template
In 2021, Energy Transfer insiders and independent board members purchased ~19.8 million units, totaling ~$154 million

2021 Insider Purchases

- Executive Chairman: ~19.1mm units; ~$148mm
- CFO: ~83k units; ~$649k
- CEO: ~81k units; ~$600k
- COO: ~34k units; ~$250k
- Board of Directors: ~503K units; ~$4.4mm

Insider Ownership vs Peers

Ownership Breakout

Management and Insiders significantly aligned with unitholders

Source: Bloomberg/Company Filings; as of 1/6/2022
Peer Group: DCP, ENB, EPD, KMI, OKE, TRGP, PAA, WMB, MMP
Interstate Segment – Gulf Run Pipeline Project
Provides An Efficient Gulf Coast Connection

Currently under construction and expected to be complete by year-end 2022

- 135-mile, 42" interstate pipeline with an expected capacity of 1.65 Bcf/d
- Backed by a 20-year commitment for 1.1 Bcf/d with cornerstone shipper Golden Pass LNG (Qatar Petroleum & Exxon Mobil)
- Unparalleled access to prolific natural gas producing regions in the U.S. with ability to deliver Haynesville-area gas to Gulf Coast Region
- Strategic fit with other ET natural gas pipelines to provide access to markets across the Texas and Louisiana Gulf Coast
Crude Oil Segment – Bakken Pipeline System

- 1,915-mile system connecting Bakken production to ET’s Nederland terminal on the Gulf Coast
- Expect additional capacity to service commitments received through open seasons to be in-service late in the third quarter of 2021
- The Bakken Pipeline delivers U.S. oil that is critical to support American jobs, tax revenue, energy security and independence
- Recently placed the next phase of incremental capacity into service, which is supported by minimum volume commitments from long-term customers
- The Bakken Pipeline now has the ability to flow ~750,000 barrels per day

1. Ownership is ET: 36.37%, MarEn: 36.75%, PSXP: 25%, XOM: ~2%
ET and Centurion Pipeline L.P. offers joint tariff crude oil service from ET’s terminal in Cushing, OK to ET’s Nederland terminal.

- Provides ability to move Powder River and DJ Basin barrels through Cushing to ET’s Nederland Terminal.
- Primarily utilizes existing assets, including ET’s White Cliffs and Permian Express 1 pipeline.
- Assets linked together via new connections in Oklahoma.
- ~65,000 bpd of crude oil capacity.
- Phase II expansion will nearly double capacity to 120,000 bpd.

Commenced service in June 2021 – expansion expected to be in service by end of Q1’22.
NGL & Refined Products Segment - A World Leader in NGL Exports

In total, ET’s market share of worldwide NGL exports has doubled over the last 24 months to nearly 20%

Expanding industry leading business while capturing future growth opportunities in new markets

Source: Internal and Kpler
NGL & Refined Products Segment – Leading Northeast NGL Franchise

**Marcus Hook Terminal**
- ~800 acre site: inbound and outbound pipeline, along with truck, rail and marine capabilities
- ~400,000 bbls/d of combined NGL and ethane export capacity at Marcus Hook Terminal
- ~2 million bbls underground NGL storage; ~3.8 million bbls (standard) above-ground NGL storage
- ~1 million bbls refined products storage capacity; ~1 million bbls crude storage capacity
- 4 export docks accommodate VLGC & VLEC sized vessels
- Began transporting natural gasoline on the Mariner system to Marcus Hook Terminal for gasoline blending and local consumption on April 1, 2021
- Positioned for further expansion and development of exports, processing, storage and manufacturing

**Mariner East Pipeline System**
- Provides transportation, storage, and terminaling services from OH / Western PA to the Marcus Hook Terminal on the East Coast
- Products include ethane, propane, butane, C3+, and natural gasoline; developing capabilities for refined products
- Supported by long-term, fee-based contracts with diversified customer base that includes producers, midstream providers and major integrated energy companies
- In addition, PA Access began flowing refined products in January 2022

Construction of the final phase of the Mariner East pipeline is complete and commissioning is in progress, which will bring its total NGL capacity to 350,000 to 375,000 bbls/d, including ethane.
As Mariner East adds refined products to its slate of liquids transportation services, tremendous synergies can be realized with ET’s existing refined products pipelines and terminals:

- Converted a portion of 8-inch ME1 NGL pipeline to refined products service
- Facilitates refined products movements from Midwest supply regions through Allegheny Access Pipeline System into PA and markets in the Northeast
- Reconnected and modified existing assets
- ~20-25,000 barrels per day of refined products capacity; easily expandable to ~50,000+ barrels per day
- Allows for efficient, inexpensive way to move refined products to meet demand
- Incremental revenue and synergies with existing ET refined products pipelines and terminal assets
- Provides flow from Ohio to Pennsylvania, and to upstate New York markets
- PA Access began flowing refined products in January 2022

PA Access Overview:

- Connect 8” ME1 line to Refined Products System At Delmont and Montello
Orbit Pipeline JV

- Orbit Joint Venture with Satellite Petrochemical USA Corp includes a new ethane export terminal on the U.S. Gulf Coast to provide ethane to Satellite’s newly-constructed ethane crackers.
- At ET’s Nederland Terminal, Orbit constructed:
  - 1.2 million barrel (standard) ethane storage tank
  - ~180,000 barrel per day ethane refrigeration facility
  - 20-inch ethane pipeline originating at ET’s Mont Belvieu facilities that will make deliveries to its Nederland export terminal, as well as domestic markets in the region
- ET is the operator of the Orbit assets, and provides storage and marketing services for Satellite.
- ET will ultimately provide Satellite with approximately 150,000 barrels per day of ethane under a long-term, demand-based agreement, which will ramp up as new Satellite facilities come online.
- In addition, ET constructed and wholly-owns the infrastructure required to supply ethane to the pipeline and to load ethane onto carriers destined for international markets.
- Loaded nearly 26 million barrels of ethane out of this facility through in 2021.
- For 2022, expect to load a minimum of 40 million barrels of ethane out of this facility, and project this to increase to up to 60 million barrels for 2023.
NGL & Refined Products Segment – Nederland LPG/Natural Gasoline Expansions

Legacy Mariner South System

- Completed in 2015, the legacy Mariner South system integrated ET’s Mont Belvieu assets with its Nederland Terminal
- Included batched butane and propane pipeline and chiller with a LPG export capacity of 180,000 BPD
- Completed de-bottlenecking in early 2020 which added ~55,000 BPD of additional export capacity

Nederland LPG Export Expansions

- Constructed new 20” pipeline from Mont Belvieu to Nederland to segregate system into separate dedicated product pipelines
- New butane chiller provided an additional 180 MBPD of LPG export capacity
- Existing chiller now dedicated to propane use
- Completed dock expansion/conversions to go from one dock to three docks capable of exporting ethane, propane, butane and natural gasoline
- New export train and dock conversion at Nederland allowed additional product loading to service international markets
- New pipeline and chiller went into service in December 2020 and will accommodate increased demand for propane and butane volumes
- Now capable of exporting ~700,000 BPD of NGLs from the Nederland Terminal

Nederland Natural Gasoline Expansions

- Loaded first barge with natural gasoline in July 2019
- Repurposed existing pipeline to export 30,000 BPD of natural gasoline
- Completed construction of new 600,000 Bbl natural gasoline storage tank in December 2020

Further established ET’s Nederland terminal as a world class export operation on the U.S. Gulf Coast
**NGL & Refined Products Segment – Pipeline & Fractionation Expansion**

---

**Lone Star Express Expansion**
- 24-inch, 352-mile expansion
- Added 400,000 bbls/d of NGL pipeline capacity from Lone Star’s pipeline system near Wink, Texas to the Lone Star Express 30-inch pipeline south of Fort Worth, Texas in 2020

**Mont Belvieu Fractionation Expansions**
- Total of 7 fractionators at Mont Belvieu
- 150,000 bbls/d Frac VI went into service in February 2019
- 150,000 bbls/d Frac VII went into service in Q1 2020

---

**Asset Overview**

- Existing ET NGL
- ET Justice
- ET Liberty
- ET Gulf Coast NGL Express
- ET Gulf Coast NGL Expansion
- ET Gulf Coast NGL WTX Gateway
- ET Spirit
- Mariner South
- ET Freedom

- Nederland Terminal
- Mt. Belvieu Fractionation & Storage
- Plant
- Fractionator
- Processing Plant
- Storage

- Current frac capacity over 900,000 bbls/d
Growing Unique Export Capabilities

**Houston Terminal**
- 330 acres on Houston Ship Channel
- 18.2 million barrels of crude and heated product storage
- ~500 thousand bbls/d of crude export capacity
- 6 ship docks, 7 barge docks
- Rail and truck loading and unloading
- Connectivity to Gulf Coast refining complex
- Pipeline connectivity to all major basins
- Deepwater marine access

**Nederland Terminal**
- ~1,200 acre site on USGC
- ~29 million bbls crude storage capacity; 1.9 million bbls refrigerated propane/butane storage capacity
- ~700 thousand bbls/d of combined LPG, ethane and natural gasoline export capacity
- ~600 thousand bbls/d of crude export capacity
- 6 ship docks (3 NGL, 4 crude capable) and 4 barge docks accommodate Suez Max sized ships
- Rail and truck unloading capabilities
- Expanded natural gasoline capabilities in 2020 to accommodate larger vessels and provide access to international markets
- Space available for further dock and tank expansion and well positioned for future growth opportunities

**Marcus Hook Terminal**
- ~800 acre site: inbound and outbound pipeline along with truck, rail and marine capabilities
- ~2 million bbls underground NGL storage; ~4 million bbls refrigerated above-ground NGL storage; ~1 million bbls crude storage capacity
- ~1 million bbls refined products storage capacity
- 4 export docks accommodate VLGC and VLEC sized vessels
- ~400 thousand bbls/d of combined LPG and ethane export capacity
- Positioned for further expansion and development of exports, processing, storage and manufacturing

Total NGL export capacity is now over 1.1 million barrels per day.
The acquisition of Enable Midstream on December 2, 2021, improved Energy Transfer’s connectivity and expanded its footprint.
ET Management has a proven track record of successfully integrating acquisitions

Knowledge of respective assets and businesses facilitates integrations of:

- Operations
- Commercial
- Risk Management
- Finance / Accounting
- Information Technology
Crude Oil Segment

~11,300 miles of crude oil trunk and gathering lines

Crude Oil Pipelines
- Directly connected to 6.8 MMbbls/d (~37%) of domestic refining capacity
- 1.1 MMbbls/d of ET-owned export capacity on USGC
- ET owns and operates substantial interests in the following systems/entities:
  - Bakken Pipeline (36.4%)
  - Bayou Bridge Pipeline (60%)
  - Permian Express Partners (87.7%)
  - White Cliffs (51%)
  - Maurepas (51%)

Crude Oil Acquisition & Marketing
- Crude truck fleet of approximately 350+ trucks, 350+ trailers, and 150+ offload facilities
- Purchase crude oil at the lease from 3,000+ producers, and in-bulk from aggregators at major pipeline interconnections and trading points
- Market crude oil to refining companies and other traders across asset base
- Optimize assets to capture time and location spreads when market conditions allow

Crude Oil Terminals
- Nederland, TX Terminal - ~31 million barrel capacity
- Houston, TX Terminal - ~18 million barrel capacity
- Cushing, OK - ~7.7 million barrel capacity
- Northeast Terminals - ~6 million barrel capacity
- Patoka, IL - ~1.9 million barrel capacity
- Midland, TX Terminal - ~1 million barrel capacity
NGL & Refined Products Segment

**NGL Storage**
- Total NGL storage ~70 million barrels
- ~53 million barrels NGL storage at Mont Belvieu
- ~10 million barrels of NGL storage at Marcus Hook & Nederland Terminals
- Hattiesburg Butane Storage ~5 million barrels

**Fractionation**
- 7 Mont Belvieu fractionators (over 900 Mbpd)
- 40 Mbpd King Ranch, 25 Mbpd Geismar
- 50 Mbpd Houston DeEthanaizer and 30 to 50 Mbpd Marcus Hook C3+ Frac in service Q4 2017
- 150 Mbpd Frac VII placed in-service Q1 2020

**NGL Pipeline Transportation**
- ~5,200 miles of NGL Pipelines throughout Texas, Midwest, and Northeast
- Lone Star Express Expansion- completed in Q3 2020
  - ~352-mile, 24-inch NGL pipeline added ~400 Mbpd
- Mont Belvieu to Nederland Pipeline System
  - 71-mile propane pipeline with 300 Mbpd capacity, expandable to 450 Mbpd
  - 71-mile butane pipeline with 200 Mbpd capacity
  - 62-mile natural gasoline pipeline with 30 Mbpd capacity
- Mariner Pipeline Franchise
  - The Mariner East Pipeline System will be capable of moving 350-375 Mbpd of NGLs (including ethane) to Marcus Hook upon full completion in the first quarter of 2022
  - PA Access provides ~20-25 Mbpd of refined products capacity to PA and NE markets
  - Mariner West Pipeline – 55 Mbpd ethane pipeline to Canada

**Refined Products**
- ~3,600 miles of refined products pipelines in the northeast, Midwest and southwest US markets
- 37 refined products marketing terminals with ~8 million barrels storage capacity

**Orbit**
- ~180 Mbpd of ethane export capacity at Nederland Terminal

---

1. JV with Satellite Petrochemical USA Corp
Midstream Segment

Midstream Highlights

- Extensive Permian Basin Footprint:
  - Have ~3.7 million acres dedicated to ET processing plants in the Permian Basin with an average of 7+ years remaining on contracts
  - Midland Basin inlet volumes continue to be at or near record highs

- Grey Wolf Processing Plant
  - 200 MMcf/d cryogenic processing plant in Delaware basin
  - Expected in service by end of 2022

- Permian Bridge
  - Converted ~55 miles of existing 24-inch NGL pipeline to rich-gas service
  - Project allows ~115 thousand MCF of rich-gas to move out of the Midland Basin to the Delaware Basin, providing access to additional takeaway options
  - Placed into service October 2021, and is already being significantly utilized
  - Expansion underway to bring pipeline’s total capacity to over 200 thousand Mcf/d in Q1 2022

Current ET Processing Capacity

~53,500 miles of gathering pipelines with ~11.2 Bcf/d of processing capacity
Our interstate pipelines provide:

- **Stability**
  - Approximately 95 percent of revenue is derived from fixed reservation fees

- **Diversity**
  - Access to multiple shale plays, storage facilities and markets

- **Growth Opportunities**
  - Well-positioned to capitalize on changing supply and demand dynamics

- **Gulf Run Pipeline Project**
  - 42-inch interstate natural gas pipeline with 1.65 Bcf/d of capacity
  - Will provide natural gas transportation between the Haynesville Shale and Gulf Coast
  - Expected compete by end of 2022

~26,600 miles of interstate pipelines with ~31 Bcf/d of throughput capacity and ~147 Bcf/d of working storage capacity
Intrastate Pipeline Segment

~ 11,600 miles of intrastate pipelines with ~24 Bcf/d of throughput capacity, and ~88 Bcf/d of working storage capacity

**Intrastate Highlights**

- Well-positioned to capture additional revenues from anticipated changes in natural gas supply and demand in the next five years
- Strategically taken steps to lock-in additional volumes under fee-based, long-term contracts with third party customers
- Evaluating Permian Basin takeaway project that would utilize Energy Transfer assets, along with a new build pipeline, to provide producers with firm capacity to the premier markets of Katy, Carthage, Gillis and Henry Hubs

Non-GAAP Reconciliation

(a) The closing of the ETO Merger in October 2018 impacted the Partnership's calculation of Distributable Cash Flow attributable to partners, as well as the number of Energy Transfer Common Units outstanding and the amount of distributions to be paid to partners. In order to provide information on a comparable basis for pre-ETO Merger and post-ETO Merger periods, the Partnership has included certain pro forma information. For 2018, Distributable Cash Flow attributable to partners presented above reflects the following ETO Merger related impacts:

- ETO is reflected as a wholly-owned subsidiary and Distributable Cash Flow attributable to partners reflects ETO’s consolidated Distributable Cash Flow (less certain other adjustments, as follows).
- Distributions from Sunoco LP and USAC include distributions to both Energy Transfer and ETO.
- Distributable Cash Flow attributable to noncontrolling interest in our other non-wholly-owned subsidiaries is subtracted from consolidated Distributable Cash Flow to calculate Distributable Cash Flow attributable to partners.

Definitions

Adjusted EBITDA and Distributable Cash Flow are non-GAAP financial measures used by industry analysts, investors, lenders and rating agencies to assess the financial performance and the operating results of Energy Transfer's fundamental business activities and should not be considered in isolation or as a substitute for net income, income from operations, cash flows from operating activities, or other GAAP measures. There are material limitations to using measures such as Adjusted EBITDA and Distributable Cash Flow, including the difficulty associated with using either as the sole measure to compare the results of one company to another, and the inability to analyze certain significant items that directly affect a company's net income or loss or cash flows. In addition, our calculations of Adjusted EBITDA and Distributable Cash Flow may not be consistent with similarly titled measures of other companies and should be viewed in conjunction with measurements that are computed in accordance with GAAP, such as segment margin, operating income, net income and cash flow from operating activities.

We define Adjusted EBITDA as total partnership earnings before interest, taxes, depreciation, depletion, amortization and other non-cash items, such as non-cash compensation expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt and other non-operating income or expense items. Inventory adjustments that are excluded from the calculation of Adjusted EBITDA represent only the changes in lower of cost or market reserves on inventory that is carried at last-in, first-out ("LIFO"). These amounts are unrealized valuation adjustments applied to Sunoco LP's fuel volumes remaining in inventory at the end of the period.

Adjusted EBITDA reflects amounts for less than wholly-owned subsidiaries based on 100% of the subsidiaries' results of operations. Adjusted EBITDA reflects amounts for unconsolidated affiliates based on the same recognition and measurement methods used to record equity in earnings of unconsolidated affiliates. Adjusted EBITDA related to unconsolidated affiliates excludes the same items with respect to the unconsolidated affiliate as those excluded from the calculation of Adjusted EBITDA, such as interest, taxes, depreciation, depletion, amortization and other non-cash items. Although these amounts are excluded from Adjusted EBITDA related to unconsolidated affiliates, such exclusion should not be understood to imply that we have control over the operations and resulting revenues and expenses of such affiliates. We do not control our unconsolidated affiliates; therefore, we do not control the earnings or cash flows of such affiliates.

Distributable Cash Flow is used by management to evaluate our overall performance. Our partnership agreement requires us to distribute all available cash, and Distributable Cash Flow is calculated to evaluate our ability to fund distributions through cash generated by our operations. We define Distributable Cash Flow as net income, adjusted for certain non-cash items, less distributions to preferred unitholders and maintenance capital expenditures. Non-cash items include depreciation, depletion and amortization, non-cash compensation expense, amortization included in interest expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt and deferred income taxes. For unconsolidated affiliates, Distributable Cash Flow reflects the Partnership’s proportionate share of the investee’s distributable cash flow.

On a consolidated basis, Distributable Cash Flow includes 100% of the Distributable Cash Flow of Energy Transfer's consolidated subsidiaries. However, to the extent that noncontrolling interests exist among the Partnership’s subsidiaries, the Distributable Cash Flow generated by our subsidiaries may not be available to be distributed to our partners. In order to reflect the cash flows available for distributions to the partners of Energy Transfer, the Partnership has reported Distributable Cash Flow attributable to the partners of Energy Transfer, which is calculated by adjusting Distributable Cash Flow (consolidated), as follows:

- For subsidiaries with publicly traded equity interests, Distributable Cash Flow (consolidated) includes 100% of Distributable Cash Flow attributable to such subsidiary, and Distributable Cash Flow attributable to the our partners includes distributions to be received by the parent company with respect to the periods presented.
- For consolidated joint ventures or similar entities, where the noncontrolling interest is not publicly traded, Distributable Cash Flow (consolidated) includes 100% of Distributable Cash Flow attributable to such subsidiaries, but Distributable Cash Flow attributable to the partners reflects only the amount of Distributable Cash Flow of such subsidiaries that is attributable to our ownership interest.

For Distributable Cash Flow attributable to partners, as adjusted, certain transaction-related and non-recurring expenses that are included in net income are excluded.
