ENERGY TRANSFER

Moving America's Energy

Investor Presentation

June 2022

Forward-looking Statements / Legal Disclaimer

Management of Energy Transfer LP (ET) will provide this presentation to analysts and/or investors at meetings to be held throughout June 2022. At the meetings, members of management may make statements about future events, outlook and expectations related to Panhandle Eastern Pipe Line Company, LP (PEPL), Sunoco LP (SUN), USA Compression Partners, LP (USAC), and ET (collectively, the Partnerships), and their subsidiaries and this presentation may contain statements about future events, outlook and expectations related to the Partnerships and their subsidiaries all of which statements are forward-looking statements. Any statement made by a member of management of the Partnerships at these meetings and any statement in this presentation that is not a historical fact will be deemed to be a forward-looking statement. These forward-looking statements rely on a number of assumptions concerning future events that members of management of the Partnerships believe to be reasonable, but these statements are subject to a number of risks, uncertainties and other factors, many of which are outside the control of the Partnerships. While the Partnerships believe that the assumptions concerning these future events are reasonable, we caution that there are inherent risks and uncertainties in predicting these future events that could cause the actual results, performance or achievements of the Partnerships and their subsidiaries to be materially different. These risks and uncertainties are discussed in more detail in the filings made by the Partnerships with the Securities and Exchange Commission, copies of which are available to the public. In addition to the risks and uncertainties disclosed in our SEC filings, the Partnership may have also been, or may in the future be, impacted by new or heightened risks related to the COVID-19 pandemic, and we cannot predict the length and ultimate impact of those risks. The Partnership has also been, and may in the future be, impacted by the winter storm in February 2021 and the resolution of related contingencies, including credit losses, disputed purchases and sales, litigation and/or potential legislative action. The Partnerships expressly disclaim any intention or obligation to revise or publicly update any forward-looking statements, whether as a result of new information, future events, or otherwise.

This presentation includes certain forward looking non-GAAP financial measures as defined under SEC Regulation G, including estimated adjusted EBITDA. Due to the forward-looking nature of the aforementioned non-GAAP financial measures, management cannot reliably or reasonably predict certain of the necessary components of the most directly comparable forward-looking GAAP measures without unreasonable effort. Accordingly, we are unable to present a quantitative reconciliation of such forward-looking non-GAAP financial measures to their most directly comparable forward-looking GAAP financial measures.

All references in this presentation to capacity of a pipeline, processing plant or storage facility relate to maximum capacity under normal operating conditions and with respect to pipeline transportation capacity, is subject to multiple factors (including natural gas injections and withdrawals at various delivery points along the pipeline and the utilization of compression) which may reduce the throughput capacity from specified capacity levels.

What's New

ENERGY TRANSFER

Operational	Financials	Strategic

Operational

- Started construction on new 200 MMcf/d Grey Wolf processing plant in the Permian Basin; expected to be in service by year-end 2022
- Announced second new processing plant in the Permian Basin
- Completed construction of the final phase of the Mariner East Pipeline in Q1'22
- During Q1'22, construction began on the Gulf Run Pipeline project, which is expected to be complete by year-end
- Completed Phase II of Cushing South Pipeline in in Q1'22 which brings capacity to 120,000 Bbls/d
- Placed expansion of Permian Bridge project into service in March 2022 which brings capacity to over 200,000 Mcf/d
- Placed Ted Collins Link into service in April 2022, providing additional connectivity for ET's Houston Terminal, the Gulf Coast oil pipeline network and the Houston Ship Channel

Financials

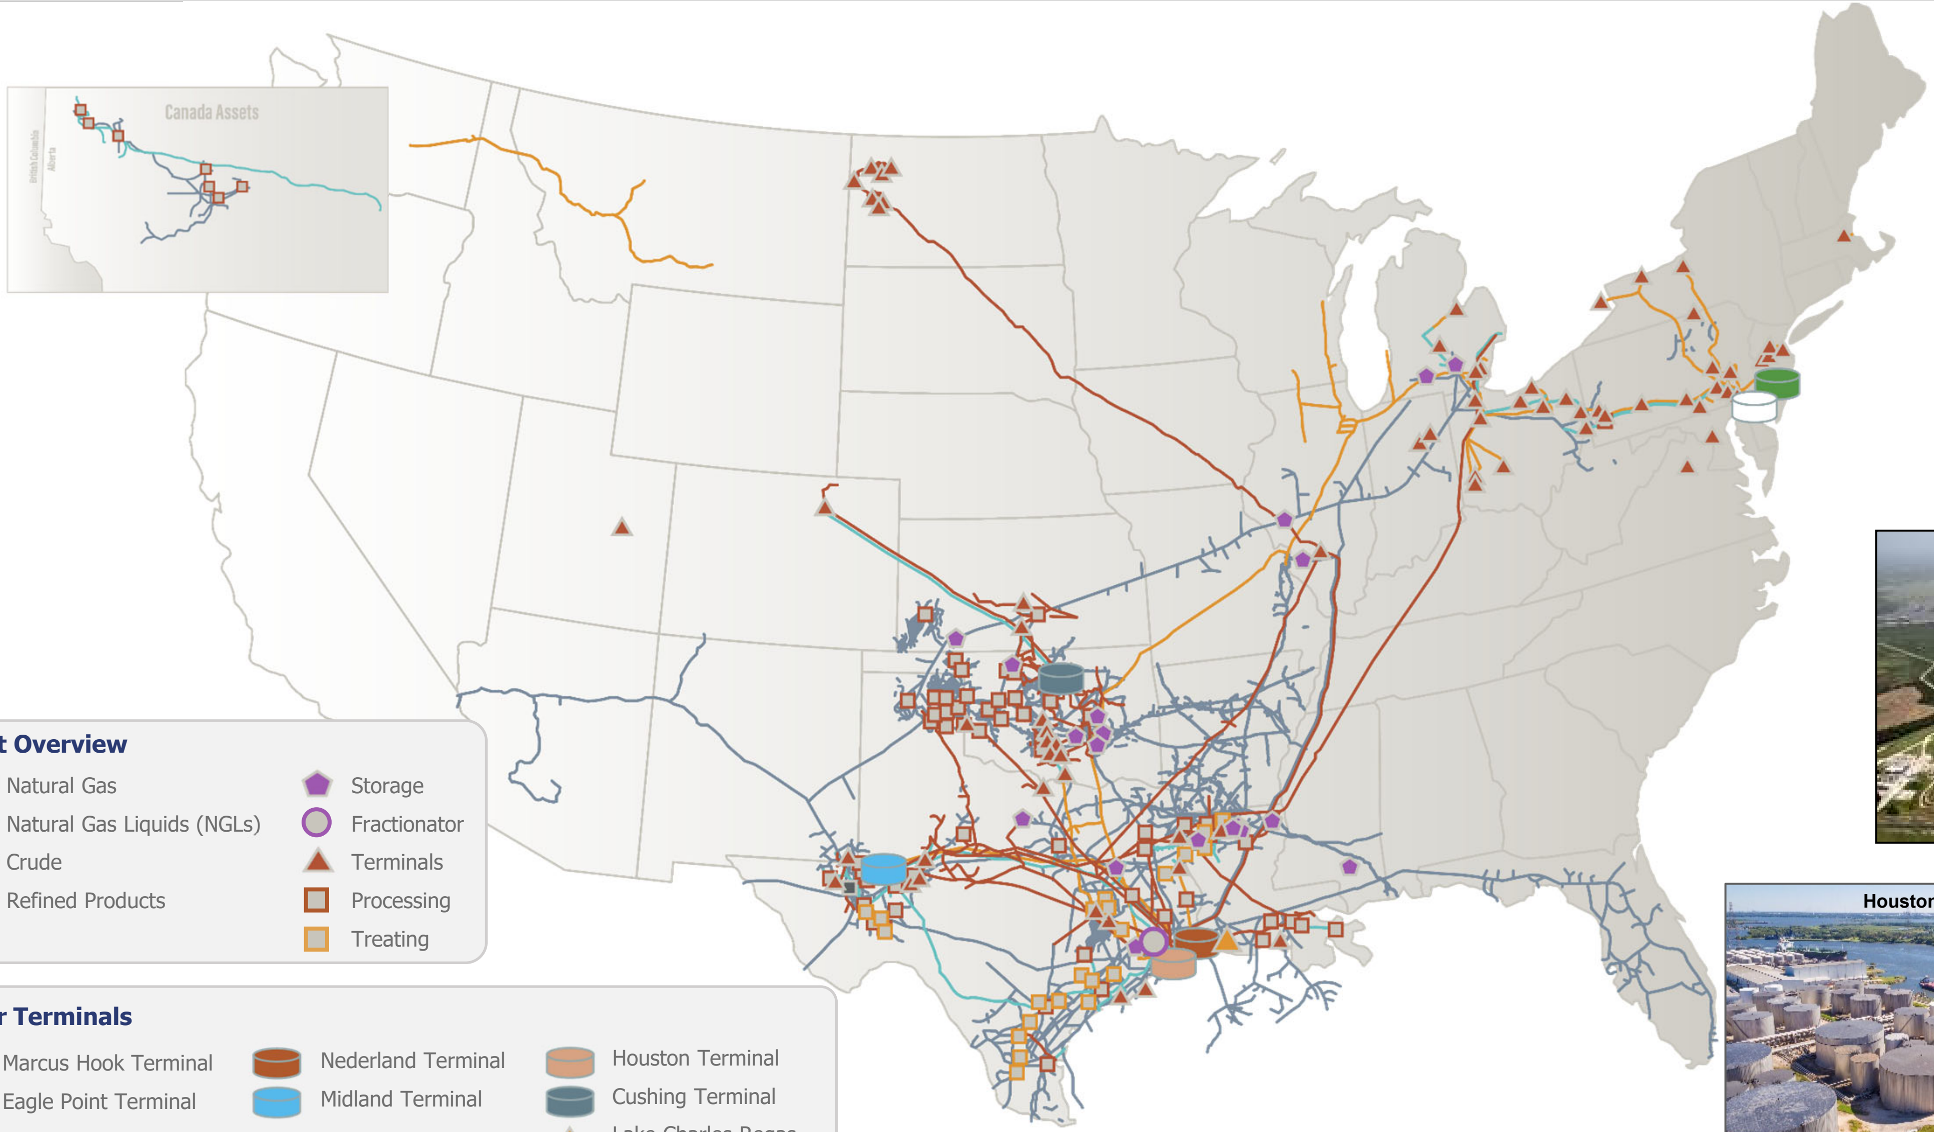
- 2022 Guidance:
  - Adjusted EBITDA: $12.2-$12.6B
  - Growth Capital: $1.8-$2.1B
- Q1'22 Capital Expenditures
  - Growth: ~$390mm
  - Maintenance: ~$110mm
- Extended maturity on revolving credit facility to April 2027 under substantially same terms and pricing

Strategic

- Lake Charles LNG executed five LNG off-take agreements to date, for an aggregate of 5.8 mtpa
- Developing new Permian Basin takeaway pipeline utilizing existing Energy Transfer assets along with a new build pipeline to connect Permian supply to markets along the Gulf Coast
- Continued feasibility and development work on NGL pipeline in Panama
- Announced agreement to sell ET Canada at a strong value – allows redeployment of capital to core footprint and further debt reduction
- Completed bolt-on acquisition of underground storage assets and ethylene header system that further enhance Mont Belvieu and Nederland positions

Strategic franchise positioned to deliver top-tier performance

Energy Transfer – A Truly Unique Franchise



Asset Overview

- Natural Gas
- Natural Gas Liquids (NGLs)
- Crude
- Refined Products
- Storage
- Fractionator
- Terminals
- Processing
- Treating

Major Terminals

- Marcus Hook Terminal

Houston Terminal

De-Risking ET

Risk	Response
Levered Balance Sheet	➢ **Significant debt reduction** ➢ Reduced long-term debt by $6.3B in 2021 (and $290mm in Q1 2022)
Project Execution Risk	➢ **Delivering growth projects** ➢ Construction of final phase of Mariner East pipeline complete ➢ Bakken optimization now in-service
Complex Company Structure	➢ **More simplified organization** ➢ ETO roll-up and reduced overhead costs ➢ Integration of recent ENBL acquisition well underway
Economic Slowdown Impacts	➢ **Uniquely positioned for improving macros** ➢ Assets in all major producing basins and connected to major markets, including export ports on gulf and east coasts
M&A Uncertainty	➢ **Financially disciplined in M&A markets** ➢ Recently closed accretive and complementary ENBL acquisition

Updated and more streamlined partnership

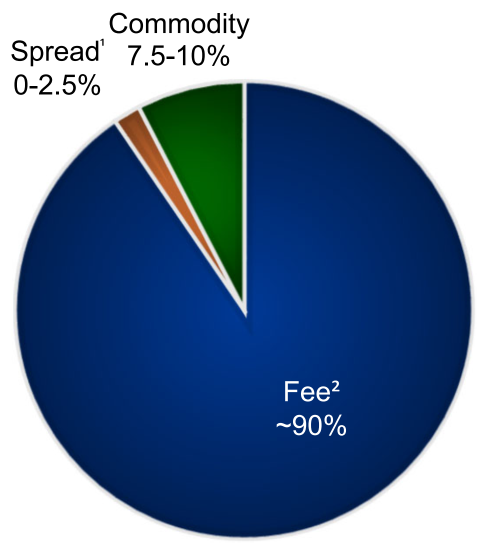
2022 Outlook Supported by Strong Core Business

ET 2022E Adjusted EBITDA $12.2 - $12.6 billion

2021 to 2022 Adjusted EBITDA Drivers

- + Enable acquisition
- + NGL pipeline and export activities
- + NGL / gas prices
- - Lower asset optimization
- - Rising costs
- + Organic Projects
  - + Orbit ethane export terminal
  - + Nederland LPG expansions
  - + Mariner East Pipeline System/PA Access
  - + Permian Bridge
  - + Cushing South
  - + Bakken optimization project

2022E Adjusted EBITDA Breakout

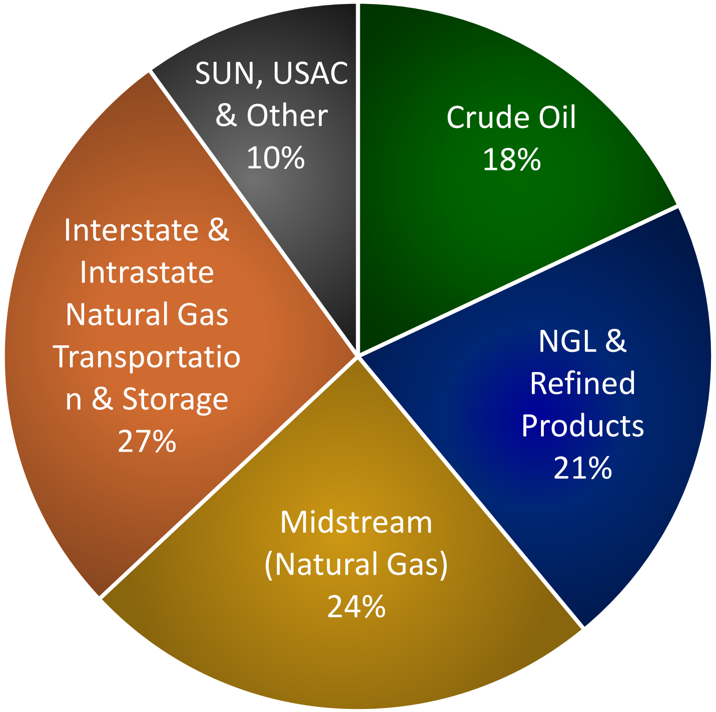


Pricing/spread assumptions based on current futures markets

1. Spread margin is pipeline basis, cross commodity and time spreads
2. Fee margins include transport and storage fees from affiliate customers at market rates

Diverse Earnings Supported by Predominantly Fee-Based Contracts

Q1 2022 Adjusted EBITDA by Segment



Segment	Contract Structure	Strength
Crude Oil	Fees from dedicated acreage, take-or-pay and throughput-based transportation, terminalling and storage	Significant connectivity to Permian, Bakken and Midcon Basins to U.S. markets, including Nederland terminal
NGL & Refined Products	Fees from plant dedications and take-or-pay transportation contracts, storage fees and fractionation fees, which are primarily frac-or-pay structures	~60 facilities connected to ET's NGL pipelines, and benefit from recent frac expansions at the Mont Belvieu complex
Interstate Transport & Storage	Fees based on reserved capacity, take-or-pay contacts	Connected to all major U.S. supply basins and demand markets, including exports
Midstream	Minimum volume commitment (MVC), acreage dedication, utilization-based fees and percent of proceeds (POP)	Significant acreage dedications, including assets in Permian, Eagle Ford, Anadarko and Marcellus/Utica Basins
Intrastate Transport & Storage	Reservation charges and transport fees based on utilization	Largest intrastate pipeline system in the U.S. with interconnects to TX markets, as well as major consumption areas throughout the US

Focused on Increased Returns and Shorter Cash Cycle

ENERGY TRANSFER

2022E Growth Capital: $1.8 billion to $2.1 billion[1]

		% of 2022E[1]
Midstream	• Grey Wolf high-recovery cryogenic processing plant • 2nd cryogenic Permian processing plant • Efficiency improvements and emissions reductions projects • Modernization and debottlenecking of existing system • Permian Bridge Pipeline project • Multiple gathering & processing and compression projects (primarily W. Texas, Northeast)	**~35%**
Interstate	• Gulf Run Pipeline project • Multiple smaller projects	**~22%**
NGL & Refined Products	• Mariner East Pipeline System • Nederland LPG facilities • Mont Belvieu frac and storage facilities • Multiple smaller projects	**~20%**
Intrastate	• New Permian gas takeaway pipeline • Oasis Pipeline optimization • Multiple smaller projects	**~17%**
Crude Oil	• Ted Collins Link • Cushing South Pipeline • Multiple smaller projects	**~6%**

Balanced investing across ET’s growing asset base with majority completed at ~6x EBITDA

1. *Includes ET legacy and recently acquired ENBL projects; Other segment growth capex makes up ~1% of 2022E growth capital*

Results Benefitting from Investments in High-Quality Growth Projects

ENERGY TRANSFER

Major growth projects added since 2017

2017	• Bakken Pipeline System* • Trans Pecos/Comanche Trail Pipelines*	• Permian Express 3* • Panther Plant • Arrowhead Plant
2018	• Rover Pipeline* • Frac V • Rebel II Plant	• Arrowhead II Plant • Mariner East 2
2019	• Bayou Bridge Phase II* • Permian Express 4* • Frac VI • Red Bluff Express Pipeline*	• JC Nolan Diesel Pipeline* • Arrowhead III Plant • Panther II Plant
2020	• Frac VII • Mariner East 2X • PA Access • Lone Star Express Expansion	• Orbit Ethane Export Terminal* • LPG Expansions
2021	• Mariner East 2X • PA Access • Cushing South Phase I*	• Bakken Optimization* • Permian Bridge
2022	• Mariner East 2 • Ted Collins Link • Cushing South Phase II*	• Permian Bridge Phase II • Grey Wolf Plant[1] • Gulf Run Pipeline[1] • 2nd Permian Processing Plant

Legacy ET Organic Growth Capital[2]

2017

MLP Investing: Why Invest In ET?

ENERGY TRANSFER

Attractive Yields	Efficient income security with high relative yield	ET current yield: **~7.5%**
Strong Earnings Power	Significant earnings capacity from critical energy infrastructure franchise	ET 2022 estimated Adjusted EBITDA: **$12.2 - $12.6 billion**
Quarterly Pay-outs	Quarterly distributions supported by significant excess cash flow	ET Q1'22 Distribution: **$0.20 ($0.80 annualized)** ET Q1'22 excess cash flow after distributions: **$1.5 billion**
Significant Excess Cash Flows	Stable cash flows from fee-based, volume-driven business models	ET earnings from fee-based margins: **~90%**

Efficiencies

- **Tax structure > Lower cost of capital compared to traditional C-Corps**
- **Single-level taxation at the partnership level > Reduced effective tax rate compared to traditional C-Corps**
- **Tax deferred investment > Significant portion of distributions to investors treated as tax deferred**
- **For more information: www.eic.energy**

Making the Case for Energy Transfer: Midstream Rankings[1]

- Rankings take into consideration: (1) valuation, (2) thematics, (3) catalysts and (4) sentiment
- "Energy Transfer trades at a discount to peers, has exposure to several themes (LNG, NGLs, Permian), has a potential catalyst in the FID of Lake Charles, and positive sentiment from investors"[1]

Alternative Energy Group – Leveraging asset base and expertise to develop projects to reduce environmental footprint

Focused on leveraging significant asset base and energy industry expertise to develop projects to reduce environmental footprint throughout operations

Dual Drive Compressors - Established in 2012
- Patented technology that allows for switching between electric motors and natural gas engines to drive compressors, and offers the industry a more efficient compression system, helping reduce greenhouse gas emissions
- In 2021, this technology allowed ET to reduce Scope 1 CO2 emissions by more than 765,000 tons, a 53% improvement over 2019
- In June 2021, our patented Dual Drive Technologies natural gas compression system was awarded a GPA Midstream Environmental Excellence award for its impact on reducing CO2 emissions

Carbon Capture Utilization and Sequestration
- Currently pursuing projects related to G&P facilities, and evaluating opportunities to capture carbon from ET and third-party facilities in the Northeast and transport CO2 through existing underutilized ET pipelines near CO2 sources
- Provide cash flows to Energy Transfer with minimal capital requirements due to structures that allow monetization of federal tax credits

Renewable Energy Use
- Approximately 20% of the electrical energy ET purchases originates from a renewable energy source

Renewable Fuels
- Evaluating opportunities to transport renewable diesel and renewable natural gas
- Benefit from significant current asset footprint

Solar
- Entered into first-ever dedicated solar contract, which anchors a 28 megawatt solar facility (Maplewood 2) in West Texas
- Operate approximately 18,000 solar panel-powered metering stations across the country
- Entered into second renewable energy power purchase agreement for 120 megawatts of electricity from facility in NE Texas

Repurpose Existing Assets
- Evaluating repurposing extensive acreage in WV, VA, KY and ND to develop solar and wind projects
- Pursuing opportunities to utilize ET's significant asset footprint for the transportation of renewable fuels, CO2 and other products

Partnership with the Arbor Day Foundation to plant 25,000 trees in 3 states in 2022. Tree planting is underway in the Michigan State Lands.

WE DO THE RIGHT THING

Corporate Responsibility

Environmental, Health, and Safety

Program Highlights

- **Committed to pursuing a zero-incident culture**
- **Real-time tracking of EHS incidents focused on leading indicators**
- **Significant use of renewable energy in operations**
- Five step risk reduction process for every EHS incident
- Compliance tracking and trending through a comprehensive Environmental Management System
- Support pipeline safety and environmental research through membership in the Pipeline Research Council International (PRCI) and the Intelligent Pipeline Integrity Program (iPIPE)
- Member API Environmental Partnership – Voluntary Methane Reduction Program

Program Accomplishments

- **Established an Alternative Energy Group to explore renewable energy projects**
- ~20% of electrical energy purchased by ET on any given day originates from renewable energy sources – enough to power ~40,000 homes
- ESG Metrics reported through EIC/GPA ESG Reporting Template
- 765,000 ton reduction of Scope 1 CO_2 emissions with ET patented Dual-drive compressors in 2021, a 53% improvement over 2019
- Continuation of Ducks Unlimited partnership in 2022 with incremental $250k commitment for wetlands restoration
- Energy Transfer's 4,000+ operations personnel are trained and qualified in accordance with pipeline safety regulations and sustain over 52,000 individual qualifications
- Received the American Gas Association's Industry Leader Accident Prevention Award for having a total DART incident rate below the industry average in 2021

Social Responsibility

Program Highlights

- **ET's charitable giving efforts focus on nonprofit organizations across the U.S. including education, hunger, health, veteran support, children's causes, environmental stewardship and combating homelessness**
- **Encourage employees to volunteer time and talents to assist others in need and to build relationships in their communities**
- Comprehensive Stakeholder Engagement Program that promotes proactive outreach and respect for all people
- Annual distribution of targeted communications materials to critical stakeholders as part of on-going emergency response and public awareness outreach programs
- Ongoing support and cooperation with Native American tribes
- Adopted America's Natural Gas Transporters' Commitment to Landowners

Program Accomplishments

- **2021 Forbes America's Best Large Employers**
- **Continue to increase number of nonprofit organizations served that are local to Energy Transfer assets**
- Ongoing Native American power agreements, easements, and scholarships
- EVP of U.S. Gas Pipelines named one of Oil and Gas Investor's 25 Influential Women in Energy for 2021
- ~7,300 emergency responders trained through Energy Transfer Outreach Programs
- In 2021, Energy Transfer and the Sunoco Foundation donated $1.6 million to MD Anderson Children's Cancer Hospital
- In 2022, began partnership with "KPRC 2 Community," to focus on community projects with the greatest impact, including working with Kids' Meals, a Houston-based non-profit to help address hunger and food insecurity for children ages 6 and under
- In 2022, partnering with the Arbor Day Foundation to plant 25,000 trees

Corporate Governance

Program Highlights

- **Oversight of EHS compliance by Independent BOD Audit Committee**
- Compensation aligned with business strategies – performance based with retention focus
- Strong enforcement of integrity and compliance standards
- ET Deputy General Counsel serves as Chief Compliance Officer
- Quarterly compliance certifications from senior management
- Alignment of management/unitholders

Program Accomplishments

- **Co-CEO Leadership and Management**
- **Increased transparency with improved website disclosures**
- Annual Senior Management compliance review
- Added resources to oversee and manage compliance
- Significant management ownership > 13% of units
- Website publication of GRI/SASB Index and EIC/GPA Midstream ESG Reporting Template

Annual Engagement Report and ESG Reporting Template available on website at energytransfer.com

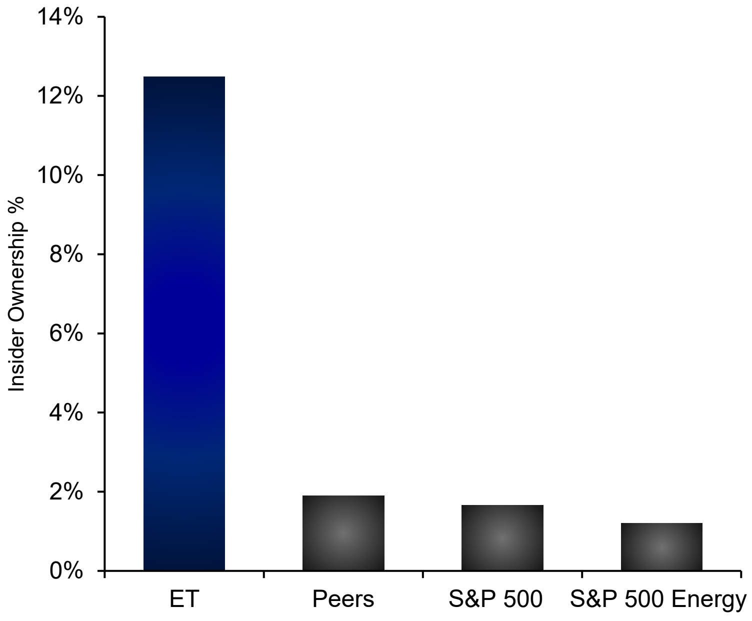
Significant Management Ownership – Continued Buying in 2021

Since January 2021, Energy Transfer insiders and independent board members purchased ~20.5 million units, totaling ~$160 million; including a director purchase of ~$5.7mm in April 2022

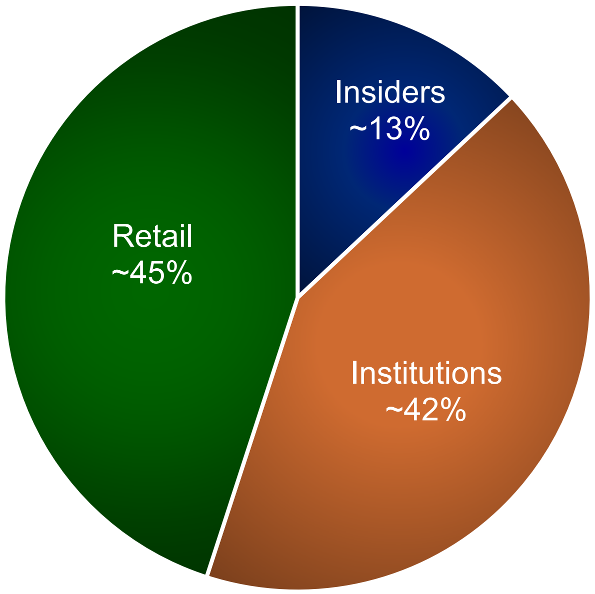
2021 Insider Purchases

- **Executive Chairman: ~19.1mm units; ~$148mm**
- **Board of Directors: ~1mm units; ~$10.3mm**
- **CEO: ~262k units; ~$1.2mm[1]**
- **CFO: ~83k units; ~$649k**

Insider Ownership vs Peers



Ownership Breakout



Management and Insiders significantly aligned with unitholders

Source: Bloomberg/Company Filings; as of 5/12/2022
Peer Group: DCP, ENB, EPD, KMI, OKE, TRGP, PAA, WMB, MMP
1. Includes ~$614k paid in tax liability to retain ~181k units associated with the vesting of a Company grant in December 2021

Comprehensive Permian Gas Takeaway Solutions
Flexibility to provide natural gas delivery to most market hubs

Waha Header

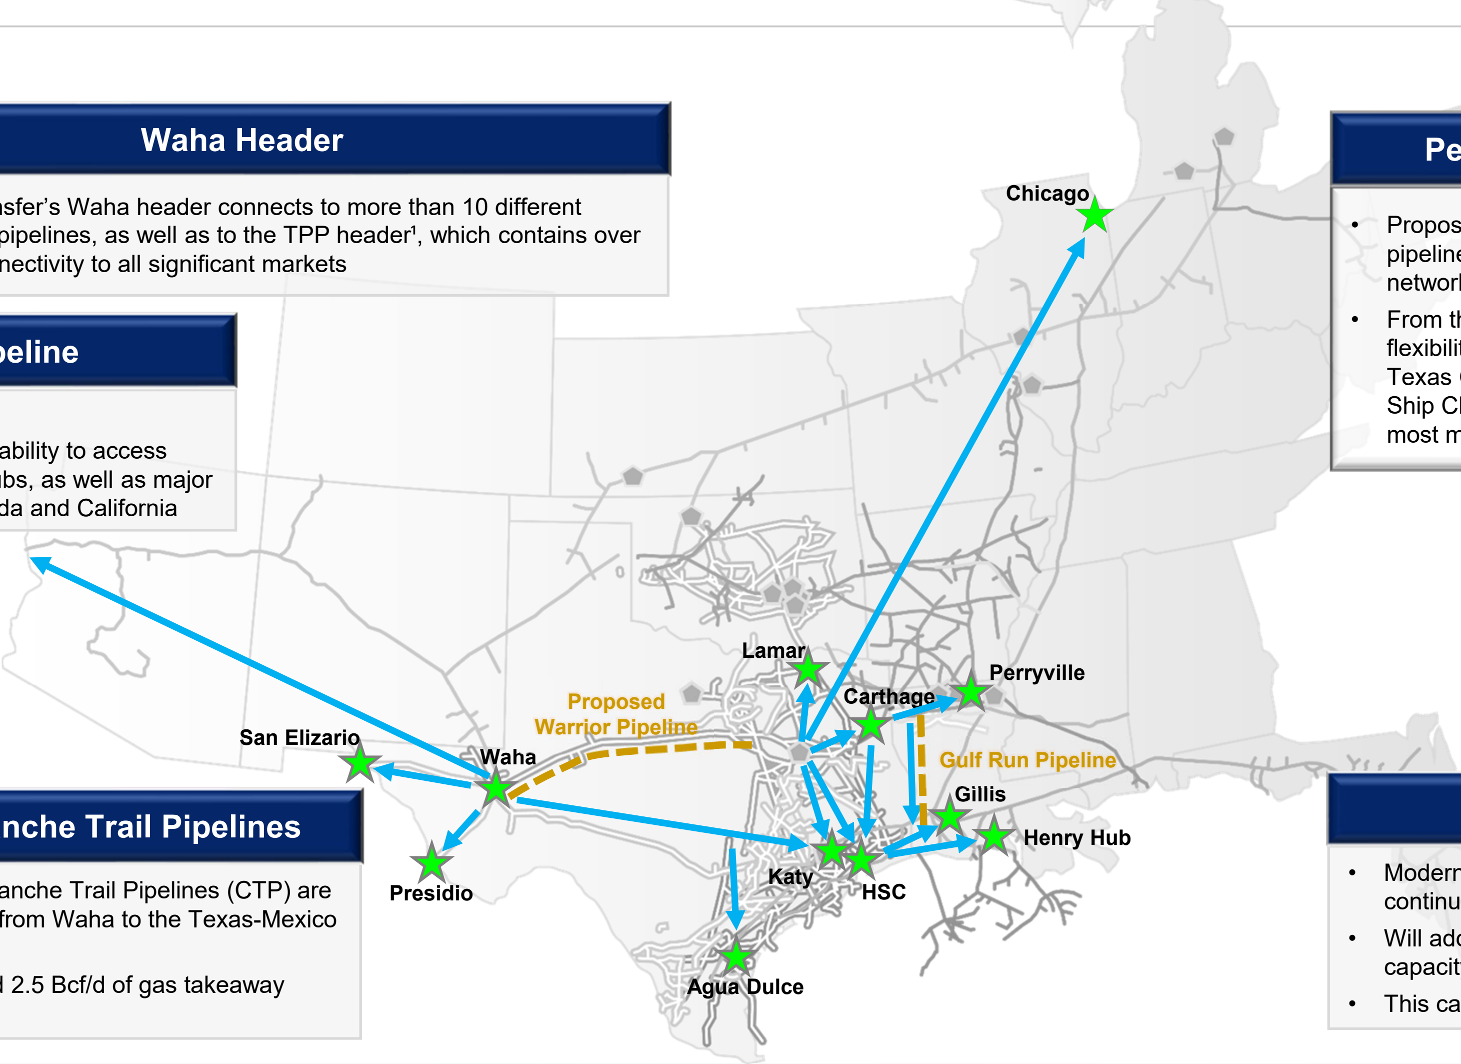
- Energy Transfer's Waha header connects to more than 10 different natural gas pipelines, as well as to the TPP header[1], which contains over 6 Bcf of connectivity to all significant markets

Transwestern Pipeline

- 2.1 Bcf/d pipeline
- Bi-directional capabilities with the ability to access Texas and Midcontinent supply hubs, as well as major western markets in Arizona, Nevada and California

Trans-Pecos and Comanche Trail Pipelines

- The Trans-Pecos (TPP) and Comanche Trail Pipelines (CTP) are designed to transport natural gas from Waha to the Texas-Mexico border[1]
- TPP and CTP provide a combined 2.5 Bcf/d of gas takeaway capacity to Mexico



Permian Natural Gas Takeaway Project

- Proposed project would include construction of a new intrastate pipeline from the Midland Basin to ET's extensive pipeline network south of the DFW area
- From there, ET's vast pipeline systems provide significant flexibility to deliver natural gas to premier markets along the Texas Gulf Coast including Katy, Beaumont, and the Houston Ship Channel, as well as to Carthage, with potential deliveries to most major U.S trading hubs and markets

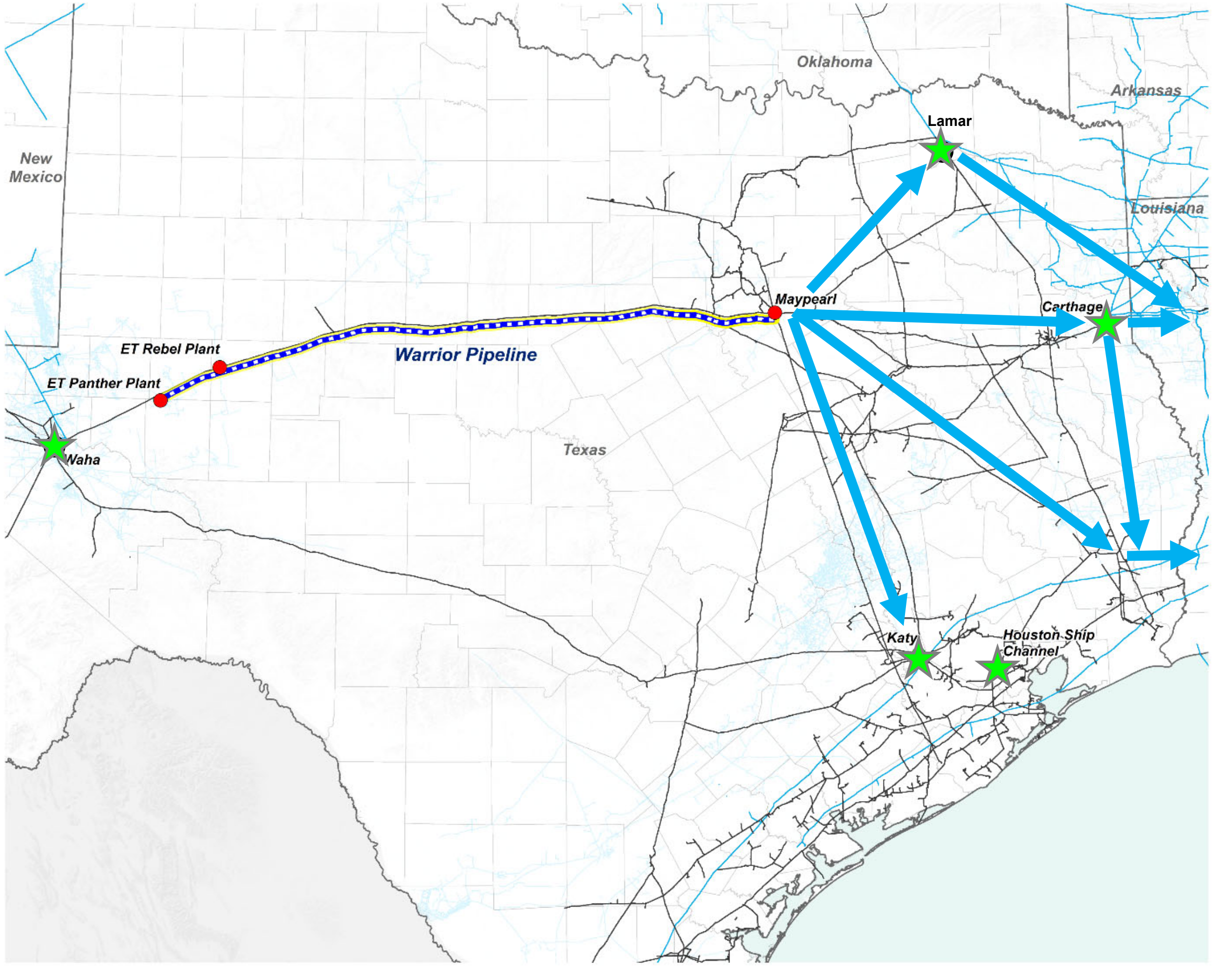
Oasis Pipeline Modernization

- Modernization and debottlenecking work on the Oasis Pipeline continues
- Will add an incremental 60,000 Mcf/d of much needed takeaway capacity out of the Permian Basin
- This capacity is expected to be available by the end of 2022

Leading Permian Natural Gas franchise provides significant options for long-term takeaway needs

1. *Energy Transfer has a 16% ownership interest in the TPP header, as well as a 16% interest in TPP and CTP*

Permian Natural Gas Takeaway Pipeline
With Cost, Time and Market Access Advantages

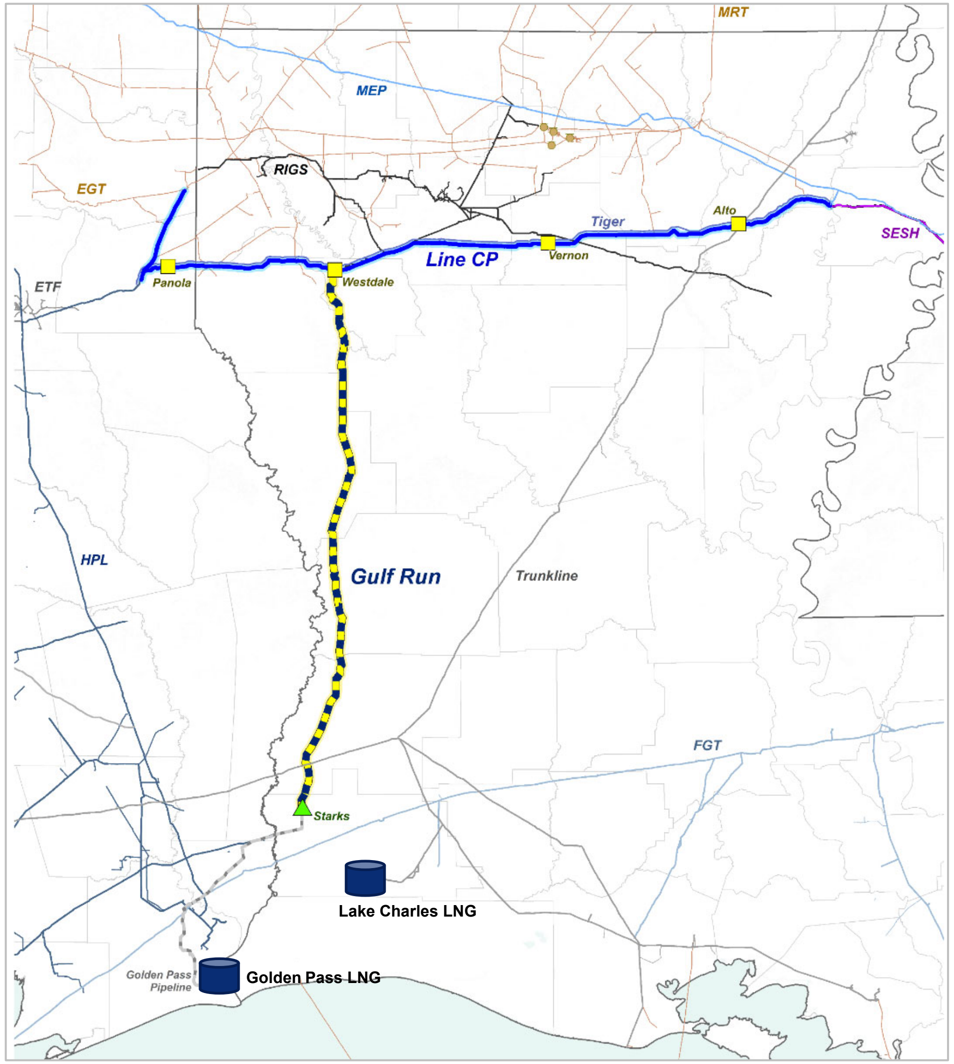


Permian Natural Gas Pipeline Project

- Evaluating a Permian natural gas takeaway project that would utilize existing Energy Transfer assets, along with a new-build pipeline, to address growing need for additional natural gas takeaway
  - Project would include construction of a new, large-diameter intrastate pipeline from Permian/Midland Basin to interconnect with ET's existing pipeline network southwest of Ft. Worth, TX
  - From there, ET's vast pipeline systems provide significant flexibility to deliver natural gas to premier markets along the Texas Gulf Coast including Katy, Beaumont, and the Houston Ship Channel, as well as to Carthage, with potential deliveries to most major U.S trading hubs and markets
  - New-build pipeline is expected to parallel existing right-of-way
  - Project can be completed more quickly and at significantly less cost than competitor projects
  - In active customer discussions to finalize commitments for the project
  - Time-sensitive survey work and regulatory process has begun
  - Once FID is reached, construction of the project could be completed in less than 2 years

New pipeline is ideal solution for natural gas growth out of the Permian Basin

Gulf Run Pipeline Project
Provides An Efficient Gulf Coast Connection



Gulf Run Pipeline Project Overview

- 135-mile, 42” interstate pipeline with an expected capacity of 1.65 Bcf/d
- Backed by a 20-year commitment for 1.1 Bcf/d with cornerstone shipper Golden Pass LNG (Qatar Petroleum & Exxon Mobil)
- Unparalleled access to prolific natural gas producing regions in the U.S. with ability to deliver Haynesville-area gas to Gulf Coast Region
- Currently under construction and expected to be complete by year-end 2022
- Developing future expansion as demand builds

Strategic fit with other ET natural gas pipelines to provide access to markets across the Texas and Louisiana Gulf Coast

Lake Charles LNG Export Terminal
Renewed Interest As Global LNG Demand Grows

Current Lake Charles Terminal Assets

- 152-acre site
- Two existing deep-water docks to accommodate ships up to 215,000 m3 capacity
- Four LNG storage tanks with capacity of 425,000 m3
- Proximity to multiple natural gas producing basins and major pipelines, including direct connection to ET's Trunkline pipeline system

Lake Charles LNG Export Project

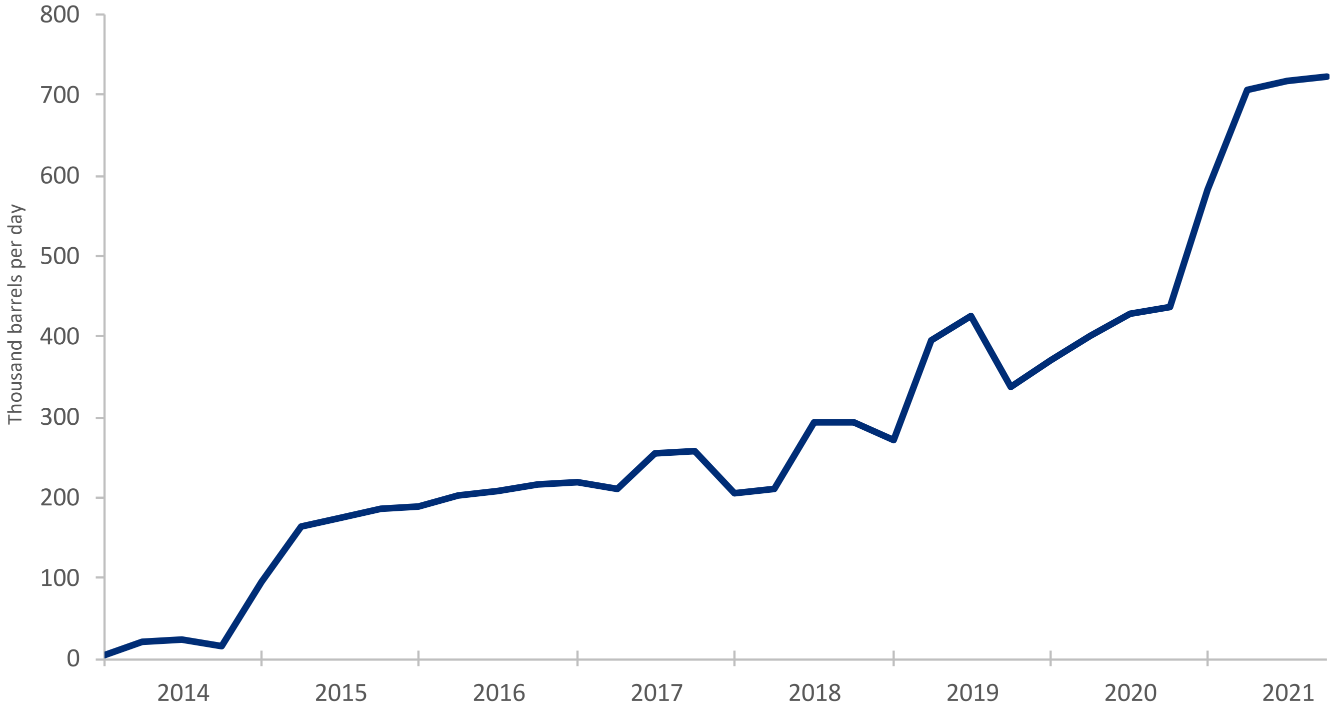
- Executed LNG Sale and Purchase Agreements (SPA) with first deliveries expected to commence as early as 2026
  - ENN Natural Gas – 1.8 million tonnes per annum for 20 years
  - ENN Energy – 0.9 million tonnes per annum for 20 years
  - Gunvor Group – 2.0 million tonnes per annum for 20 years
  - SK Gas – 0.4 million tonnes per annum for 18 years
  - China Gas – 0.7 million tonnes per annum for 25 years
  - The purchase price for all agreements is indexed to the Henry Hub benchmark, plus a fixed liquefaction charge, and the LNG will be delivered on a free-on-board (FOB) basis
  - SPAs become fully effective upon satisfaction of the conditions precedent by ET, including reaching a Final investment decision (FID)
- In active negotiations with a number of high-quality customers, and expect to make announcements of additional offtake agreements
- The only brownfield project among those proposed on the U.S. Gulf Coast, providing timeline and cost advantages
- Estimated export capacity of up to 16.5 million tonnes per year
- On May 6, 2022, FERC granted Lake Charles LNG's and Trunkline's extension of time request to allow for completion of construction and modifications until December 16, 2028
- ET is currently targeting making FID by year-end 2022

Recent contracts provide positive momentum in moving the Lake Charles LNG project toward FID

NGL & Refined Products Segment - A World Leader in NGL Exports

In total, ET's market share of worldwide NGL exports has doubled over the last 24 months to nearly 20%

ET NGL Exports



Expanding industry leading business while capturing future growth opportunities in new markets

Source: Internal and Kpler

NGL & Refined Products Segment – Leading Northeast NGL Franchise

Comprehensive Marcellus/Utica Shale solution reaching local, regional and international markets

Marcus Hook Terminal

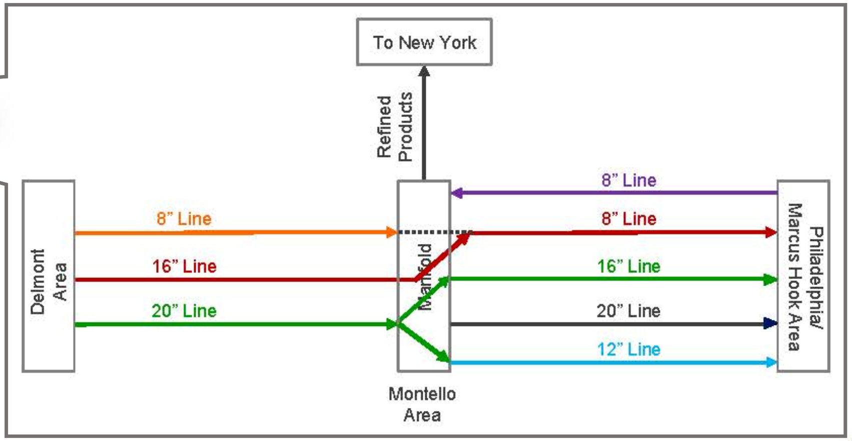
- ~800 acre site: inbound and outbound pipeline, along with truck, rail and marine capabilities
- ~400,000 bbls/d of combined NGL and ethane export capacity at Marcus Hook Terminal
- ~2 million bbls underground NGL storage; ~3.8 million bbls (standard) above-ground NGL storage; ~1 million bbls refined products storage capacity; ~1 million bbls crude storage capacity[1]
- 4 export docks accommodate VLGC & VLEC sized vessels
- Began transporting natural gasoline on the Mariner system to Marcus Hook Terminal for gasoline blending and local consumption on April 1, 2021
- Positioned for further expansion and development of exports, processing, storage and manufacturing

Mariner East Pipeline System

- Provides transportation, storage, and terminaling services from OH / Western PA to the Marcus Hook Terminal on the East Coast
- Products include ethane, propane, butane, C3+, and natural gasoline; developing capabilities for refined products
- Supported by long-term, fee-based contracts with diversified customer base that includes producers, midstream providers and major integrated energy companies
- In addition, PA Access began flowing refined products in January 2022

Construction of the final phase of the Mariner East pipeline is complete, which brought its total NGL capacity to 350,000 to 375,000 bbls/d, including ethane

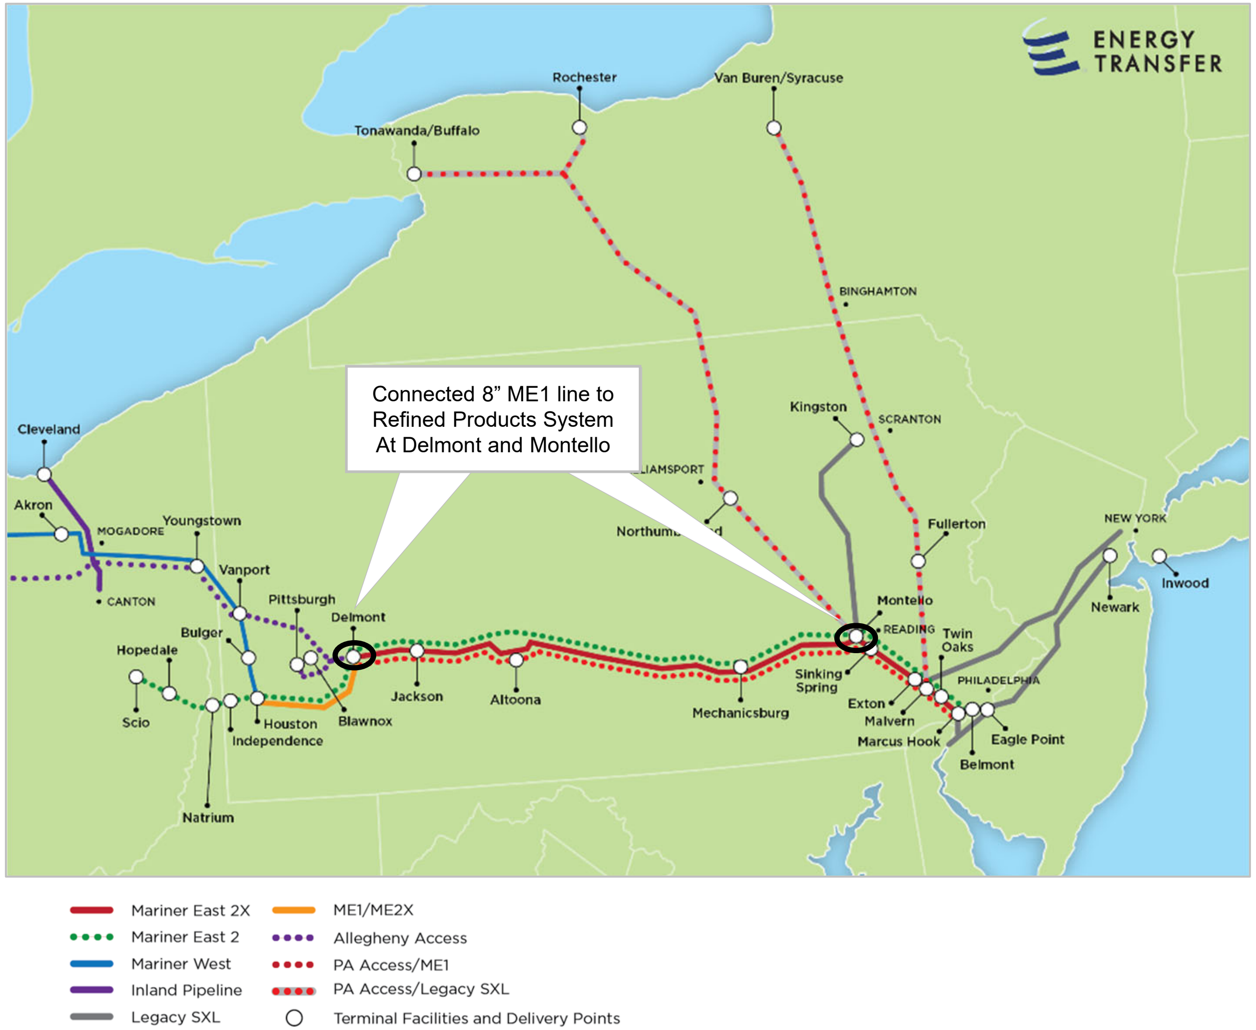
- 8” ME1 Pipeline[2]
- 20” ME2 Pipeline
- 16” ME2X Pipeline
- 8” RP Pipeline
- 12” ME2/GRE Pipeline
- ET Terminal Facilities
- Third Party Facility
- PA Propane Delivery
- Marcus Hook Terminal
- Third Party Pipeline
- Marcellus Shale



1. *Note: crude storage reported in Crude Oil Transportation & Services segments*
2. *A portion of ME1 has been converted to refined products service as part of the PA Access project*
3. This is a concept drawing. Actual pipe sizes and connection locations within each line segments vary

NGL & Refined Products Segment – Pennsylvania Access

As Mariner East adds refined products to its slate of liquids transportation services, tremendous synergies can be realized with ET's existing refined products pipelines and terminals

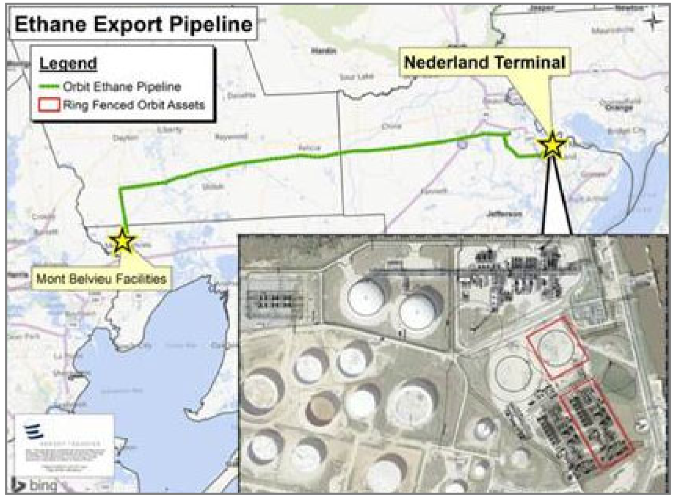


PA Access Overview

- Converted a portion of 8-inch ME1 NGL pipeline to refined products service
- Facilitates refined products movements from Midwest supply regions through Allegheny Access Pipeline System into PA and markets in the Northeast
- Reconnected and modified existing assets
- ~20-25,000 barrels per day of refined products capacity; easily expandable to ~50,000+ barrels per day
- Allows for efficient, inexpensive way to move refined products to meet demand
- Incremental revenue and synergies with existing ET refined products pipelines and terminal assets
- Provides flow from Ohio to Pennsylvania, and to upstate New York markets
- PA Access began flowing refined products in January 2022

NGL & Refined Products Segment – Ethane Export Project

Ethane Export Pipeline and Terminal Facilities



The Seri Everest, The World's Largest VLEC

Orbit Pipeline JV

- Orbit Joint Venture with Satellite Petrochemical USA Corp includes a new ethane export terminal on the U.S. Gulf Coast to provide ethane to Satellite's newly-constructed ethane crackers
- At ET's Nederland Terminal, Orbit constructed:
  - 1.2 million barrel (standard) ethane storage tank
  - ~180,000 barrel per day ethane refrigeration facility
  - 20-inch ethane pipeline originating at ET's Mont Belvieu facilities that will make deliveries to its Nederland export terminal, as well as domestic markets in the region
- ET is the operator of the Orbit assets, and provides storage and marketing services for Satellite
- ET will ultimately provide Satellite with approximately 150,000 barrels per day of ethane under a long-term, demand-based agreement, which will ramp up as new Satellite facilities come online
- In addition, ET constructed and wholly-owns the infrastructure required to supply ethane to the pipeline and to load ethane onto carriers destined for international markets
- Loaded nearly 26 million barrels of ethane out of this facility through in 2021
- For 2022, expect to load a minimum of 40 million barrels of ethane out of this facility, and project this to increase to up to 60 million barrels for 2023

NGL & Refined Products Segment –
Mont Belvieu to Nederland Pipeline System

Nederland Natural Gasoline Expansions

- Loaded first barge with natural gasoline in July 2019
- Repurposed existing pipeline to export 30,000 BPD of natural gasoline
- Completed construction of new 600,000 Bbl natural gasoline storage tank in December 2020

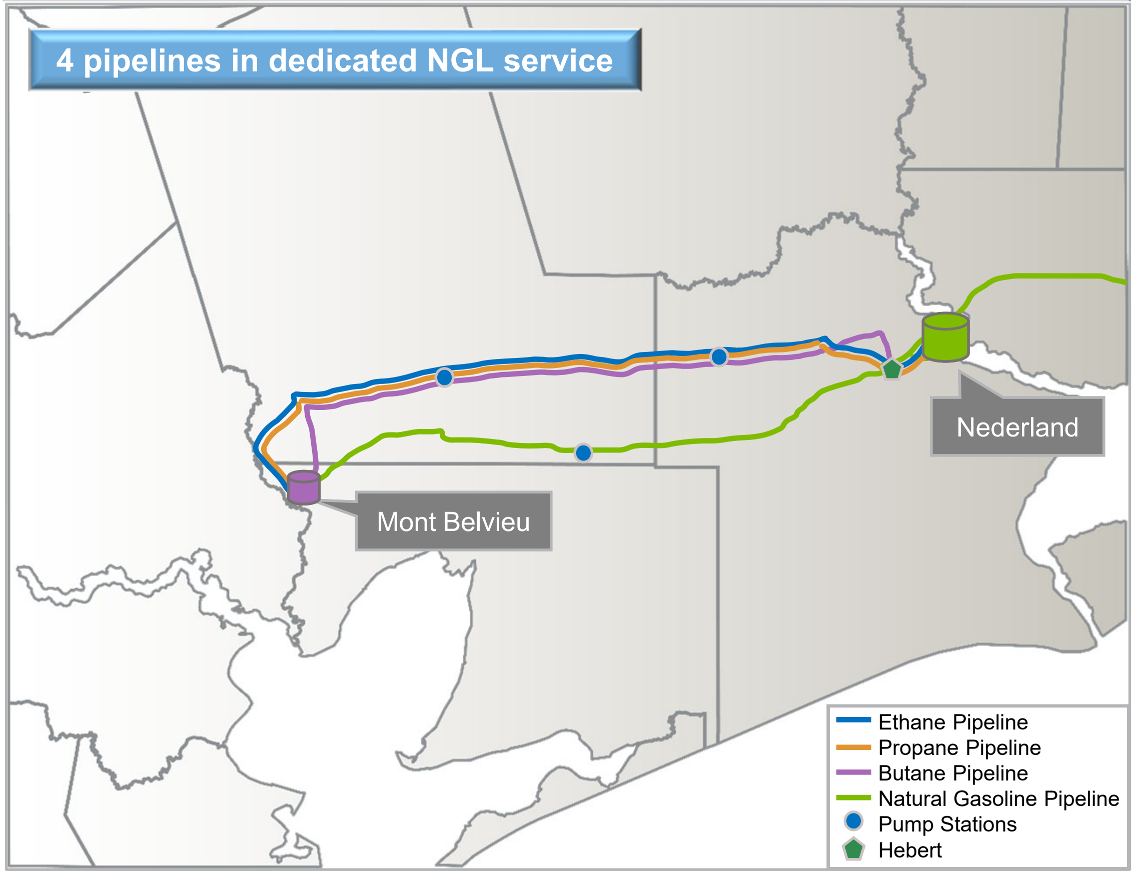
Legacy Mariner South System

- Completed in 2015, the legacy Mariner South system integrated ET's Mont Belvieu assets with its Nederland Terminal
- Included batched butane and propane pipeline and chiller with LPG export capacity of 180,000 BPD
- Completed de-bottlenecking in early 2020 which added ~55,000 BPD of additional export capacity

Nederland LPG Export Expansions

- Constructed new 20" pipeline from Mont Belvieu to Nederland to segregate system into separate dedicated product pipelines
- New butane chiller provided an additional 180 MBPD of LPG export capacity (existing chiller now dedicated to propane use)
- Completed dock expansion/conversions, going from one dock to three docks capable of exporting ethane, propane, butane and natural gasoline
- New export train and dock conversion at Nederland allowed additional product loading to service international markets
- New pipeline and chiller went into service in December 2020 to accommodate increased demand for propane and butane volumes
- Now capable of exporting ~700,000 BPD of NGLs from the Nederland Terminal

Mont Belvieu to Nederland Pipeline System



Energy Transfer's Nederland terminal is a world class export facility on the U.S. Gulf Coast

NGL & Refined Products Segment – Pipeline & Fractionation Expansion

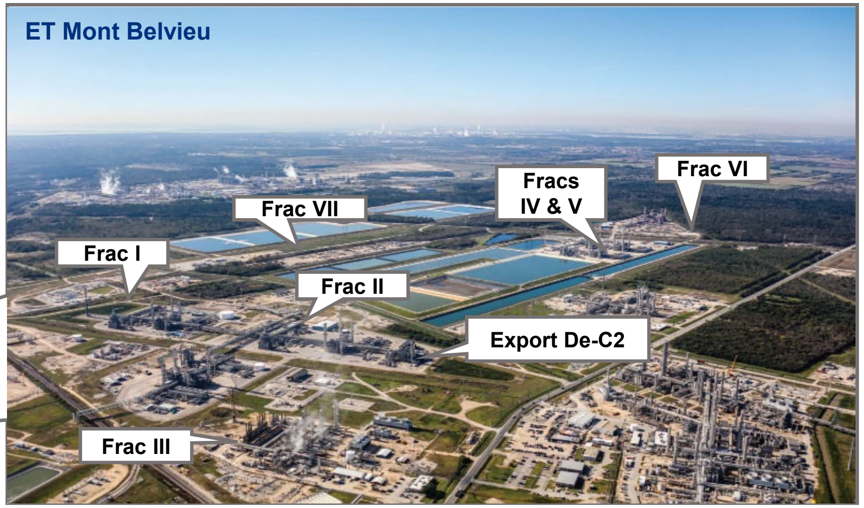
Lone Star Express Expansion

- 24-inch, 352-mile expansion
- Added incremental NGL pipeline capacity from Lone Star's pipeline system near Wink, Texas to the Lone Star Express 30-inch pipeline south of Fort Worth, Texas
- Completed in Q3 2020

Total Permian NGL takeaway capacity is ~1 million bbls/d

Mont Belvieu Fractionation Expansions

- Total of 7 fractionators at Mont Belvieu
- 150,000 bbls/d Frac VI went into service in February 2019
- 150,000 bbls/d Frac VII went into service in Q1 2020



Current Mont Belvieu frac capacity over 900,000 bbls/d

Growing Unique Export Capabilities

ENERGY TRANSFER

Total NGL export capacity is now over 1.1 million barrels per day

Houston Terminal

- 330 acres on Houston Ship Channel
- 18.2 million barrels of crude and heated product storage
- ~500 thousand bbls/d of crude export capacity
- 5 ship docks, 7 barge docks
- Rail and truck loading and unloading
- Connectivity to Gulf Coast refining complex
- Pipeline connectivity to all major basins
- Deepwater marine access

Marcus Hook Terminal

- ~800 acre site: inbound and outbound pipeline along with truck, rail and marine capabilities
- ~2 million bbls underground NGL storage; ~4 million bbls refrigerated above-ground NGL storage; ~1 million bbls crude storage capacity
- ~1 million bbls refined products storage capacity
- 4 export docks accommodate VLGC and VLEC sized vessels
- ~400 thousand bbls/d of combined LPG and ethane export capacity
- Positioned for further expansion and development of exports, processing, storage and manufacturing

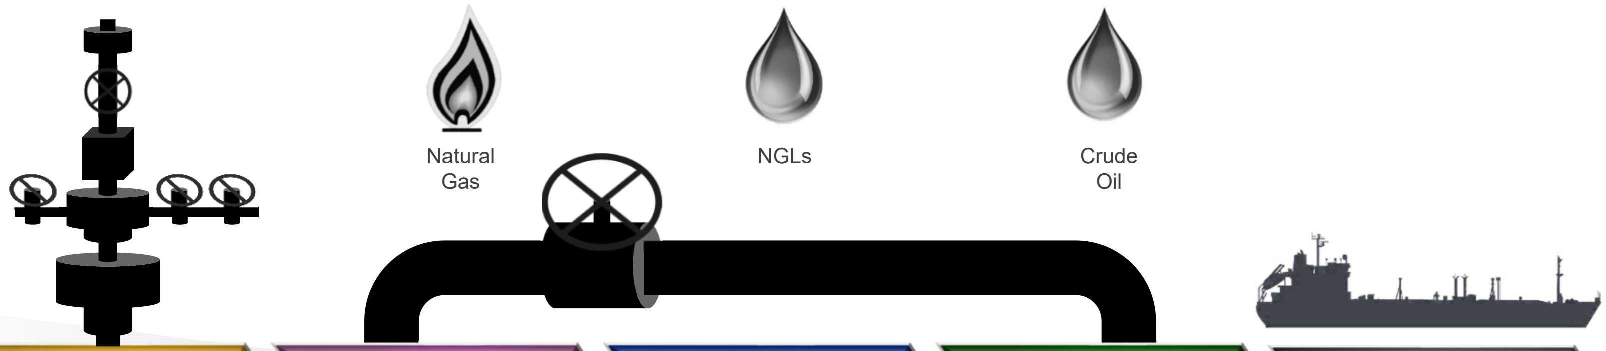
Nederland Terminal

- ~1,200 acre site on USGC
- ~29 million bbls crude storage capacity; 1.9 million bbls refrigerated propane/butane storage capacity
- 1.2 million bbls (standard) ethane storage tank as part of Orbit joint venture
- ~700 thousand bbls/d of combined LPG, ethane and natural gasoline export capacity
- ~600 thousand bbls/d of crude export capacity
- 6 ship docks (3 NGL, 4 crude capable) and 4 barge docks accommodate Suez Max sized ships
- Rail and truck unloading capabilities
- Expanded natural gasoline capabilities in 2020 to accommodate larger vessels and provide access to international markets
- Space available for further dock and tank expansion and well positioned for future growth opportunities

Seeing strong interest from oversees customers and are currently evaluating the best location for an ethane expansion project

ET & ENBL Complementary Assets

Wellhead to Water Service



- Gather ~ 17.3 million mmbtu/d of gas & 757,000 bbls/d of NGLs produced
- Transport ~29.1 million mmbtu/d of natural gas via inter & intrastate pipelines
- Fractionate ~805 thousand bbls/d of NGLs at Mont Belvieu
- Transport ~4.2 million bbls/d of crude oil
- Capable of exporting ~1.1 million bbls/d of crude oil and 1.1 million+ bbls/d of NGLs

The acquisition of Enable Midstream on December 2, 2021, improved Energy Transfer’s connectivity and expanded its footprint

Note: As of 3/31/2022

Successful Acquisition Track Record

ENERGY TRANSFER

TUFCO	2004
HPL Houston Pipeline Co.	2005
Transwestern Pipeline	2006
LDH ENERGY	2011
Southern Union Company	2012
Southern Union Gas Services	2012
SUNOCO	2012
SUSSER Holdings Corporation	2014
REGENCY ENERGY PARTNERS	2015
PennTex MIDSTREAM PARTNERS	2016
Sunoco Logistics	2017
SemGroup	2019
ENABLE MIDSTREAM PARTNERS	2021

- ET Management has a proven track record of successfully integrating acquisitions
- Knowledge of respective assets and businesses facilitates integrations of:
  - Operations
  - Commercial
  - Risk Management
  - Finance / Accounting
  - Information Technology

Appendix

Crude Oil Segment

~11,300 miles of crude oil trunk and gathering lines

Crude Oil Pipelines

- Directly connected to 6.8 MMbbls/d (~37%) of domestic refining capacity
- 1.1 MMbbls/d of ET-owned export capacity on USGC
- ET owns and operates substantial interests in the following systems/entities:
  - Bakken Pipeline (36.4%)
  - Bayou Bridge Pipeline (60%)
  - Permian Express Partners (87.7%)
  - White Cliffs (51%)
  - Maurepas (51%)

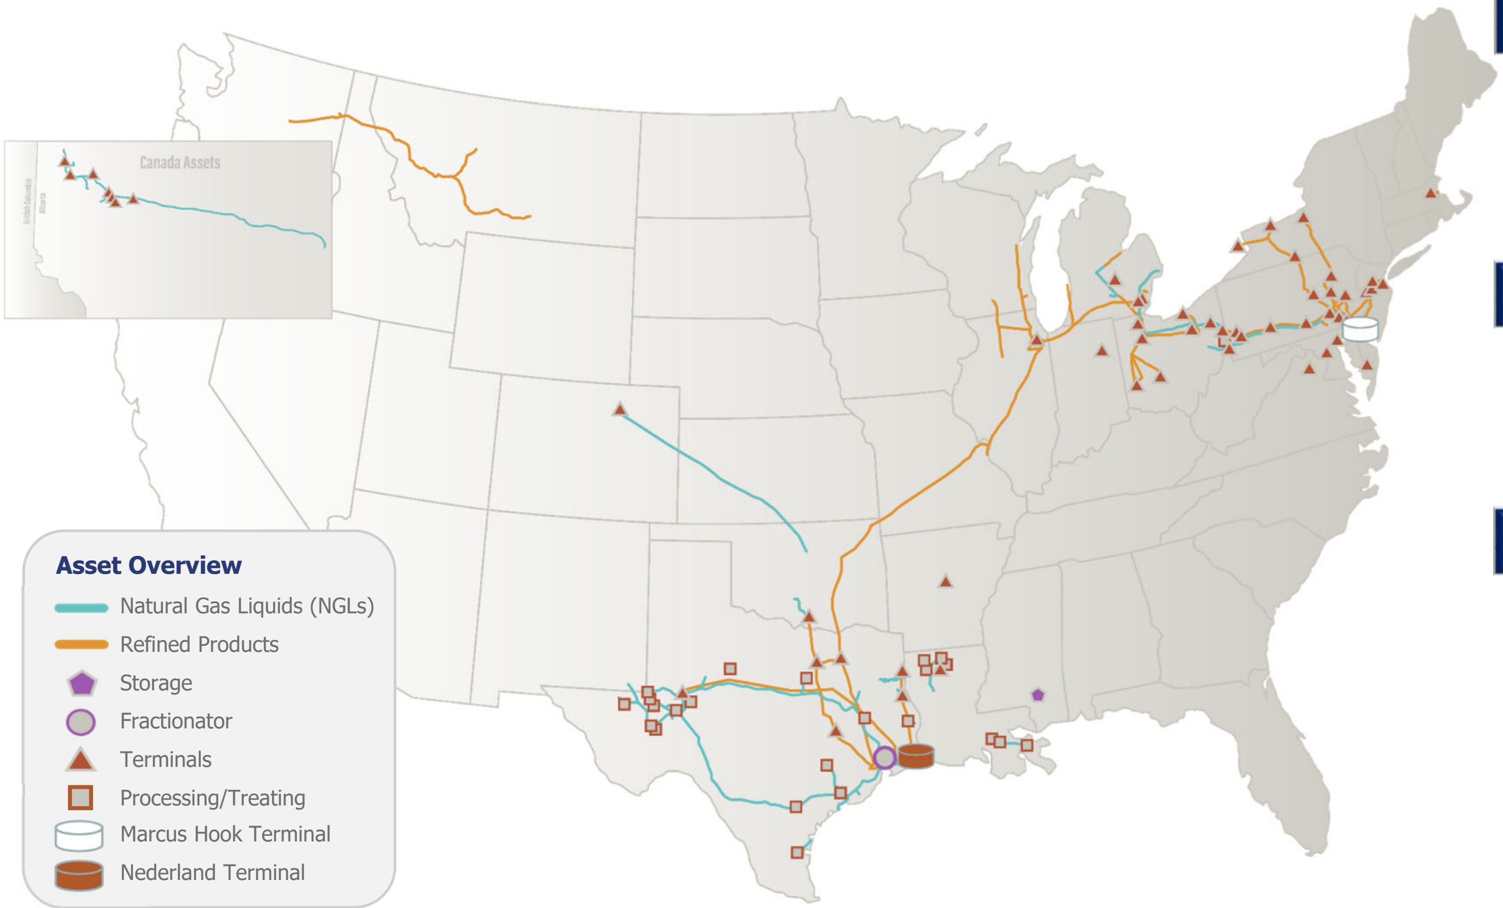
Crude Oil Acquisition & Marketing

- Crude truck fleet of approximately 350+ trucks, 350+ trailers, and 150+ offload facilities
- Purchase crude oil at the lease from 3,000+ producers, and in-bulk from aggregators at major pipeline interconnections and trading points
- Market crude oil to refining companies and other traders across asset base
- Optimize assets to capture time and location spreads when market conditions allow

Crude Oil Terminals

- Nederland, TX Terminal - ~31 million barrel capacity
- Houston, TX Terminal - ~18 million barrel capacity
- Cushing, OK - ~7.7 million barrel capacity
- Northeast Terminals - ~6 million barrel capacity
- Patoka, IL - ~1.9 million barrel capacity
- Midland, TX Terminal - ~1 million barrel capacity

NGL & Refined Products Segment



Fractionation

- 7 Mont Belvieu fractionators (over 900 Mbpd)
- 40 Mbpd King Ranch, 25 Mbpd Geismar
- 50 Mbpd Houston DeEthanizer and 30 to 50 Mbpd Marcus Hook C3+ Frac in service Q4 2017
- 150 Mbpd Frac VII placed in-service Q1 2020

NGL Storage

- Total NGL storage ~70 million barrels
- ~53 million barrels NGL storage at Mont Belvieu
- ~10 million barrels of NGL storage at Marcus Hook & Nederland Terminals
- Hattiesburg Butane Storage ~5 million barrels

NGL Pipeline Transportation

- ~5,200 miles of NGL Pipelines throughout Texas, Midwest, and Northeast
- Lone Star Express Expansion- completed in Q3 2020
  - ~352-mile, 24-inch NGL pipeline added incremental NGL takeaway capacity from Permian Basin
- Mont Belvieu to Nederland Pipeline System
  - 71-mile propane pipeline with 300 Mbpd capacity, expandable to 450 Mbpd
  - 71-mile butane pipeline with 200 Mbpd capacity
  - 62-mile ethane pipeline with 200 Mbpd, expandable to 450 Mbpd
  - 62-mile natural gasoline pipeline with 30 Mbpd capacity
- Mariner Pipeline Franchise
  - The Mariner East Pipeline System is now capable of moving 350-375 Mbpd of NGLs (including ethane) to Marcus Hook
  - PA Access provides ~20-25 Mbpd of refined products capacity to PA and NE markets
  - Mariner West Pipeline – 55 Mbpd ethane pipeline to Canada

Orbit[1]

- ~180 Mbpd of ethane export capacity at Nederland Terminal

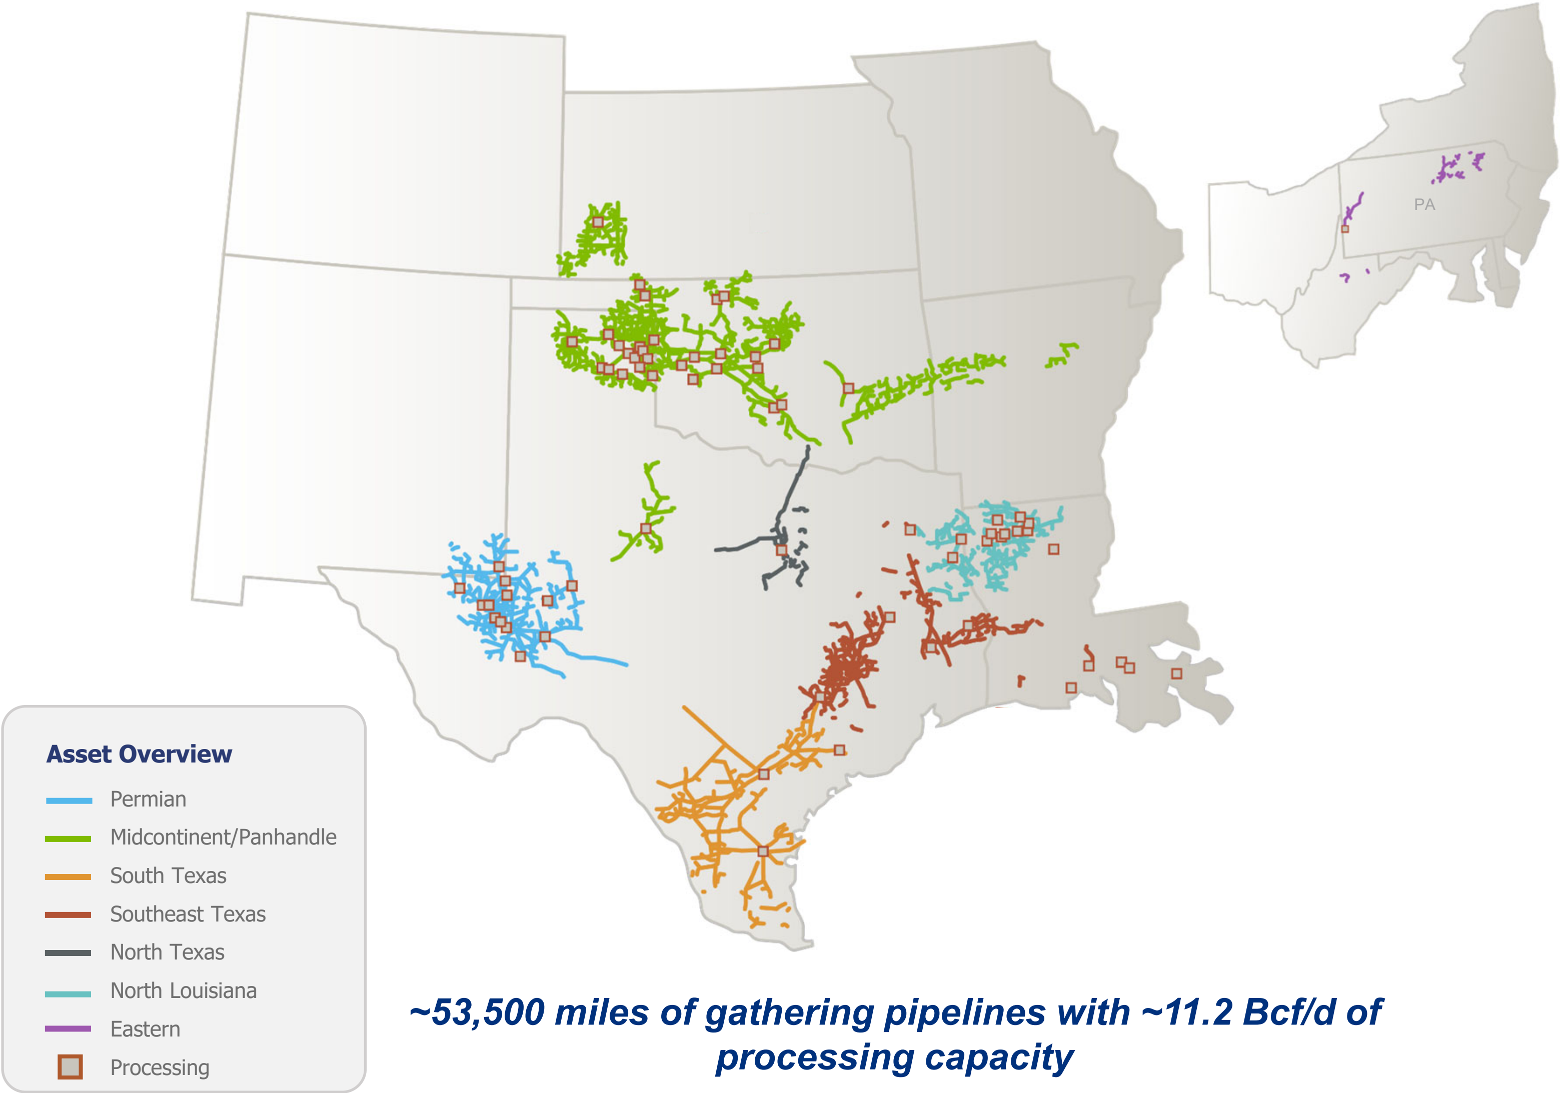
Refined Products

- ~3,600 miles of refined products pipelines in the northeast, Midwest and southwest US markets
- 37 refined products marketing terminals with ~8 million barrels storage capacity

1. *JV with Satellite Petrochemical USA Corp*

Midstream Segment

ENERGY TRANSFER



~53,500 miles of gathering pipelines with ~11.2 Bcf/d of processing capacity

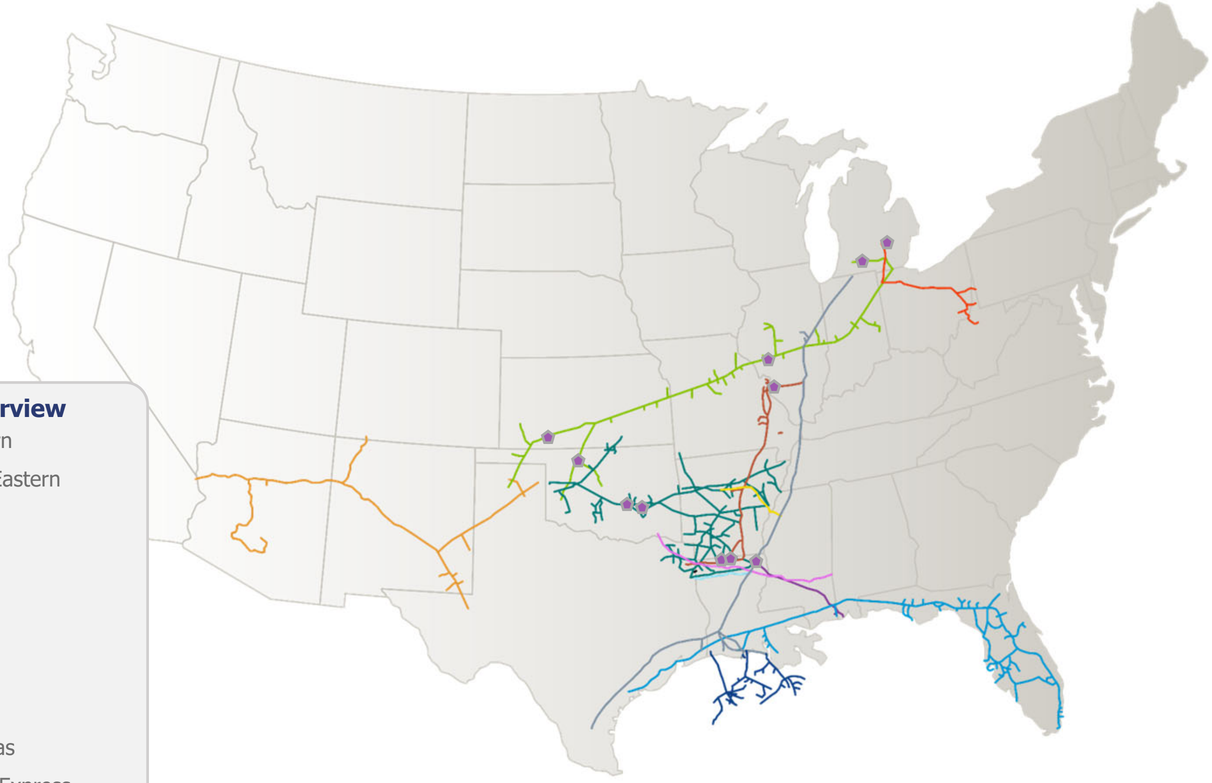
Midstream Highlights

- Extensive Permian Basin Footprint:
  - Have ~3.7 million acres dedicated to ET processing plants in the Permian Basin with an average of 7+ years remaining on contracts
  - Midland Basin inlet volumes continue to be at or near record highs
- Grey Wolf Processing Plant
  - 200 MMcf/d cryogenic processing plant in Delaware basin
  - Expected in service by end of 2022
  - Due to significant producer demand, anticipate moving forward with a second processing plant in the Permian Basin
- Permian Bridge
  - Converted ~55 miles of existing 24-inch NGL pipeline to rich-gas service
  - Project allows ~200 thousand MCF/d of rich-gas to move out of the Midland Basin to the Delaware Basin, providing access to additional takeaway options
  - Phase I was placed into service October 2021 and an expansion was placed into service in Q1 2022

Current ET Processing Capacity

	Bcf/d	Basins Served
Permian	2.7	Permian, Midland, Delaware
Midcontinent/Panhandle	3.1	Granite Wash, Cleveland, DJ, STACK
North Texas	0.7	Barnett, Woodford
South Texas	1.9	Eagle Ford
North Louisiana	2.1	Haynesville, Cotton Valley
Southeast Texas	0.4	Eagle Ford, Eagle Bine
Eastern	0.2	Marcellus Utica

Interstate Natural Gas Pipeline Segment



Asset Overview
- Transwestern
- Panhandle Eastern
- EGT
- FGT
- MRT
- SESH
- Gulf States
- Tiger
- Trunkline Gas
- Fayetteville Express
- Rover
- Sea Robin/Stingray
- Midcontinent Express

Interstate Highlights

Our interstate pipelines provide:

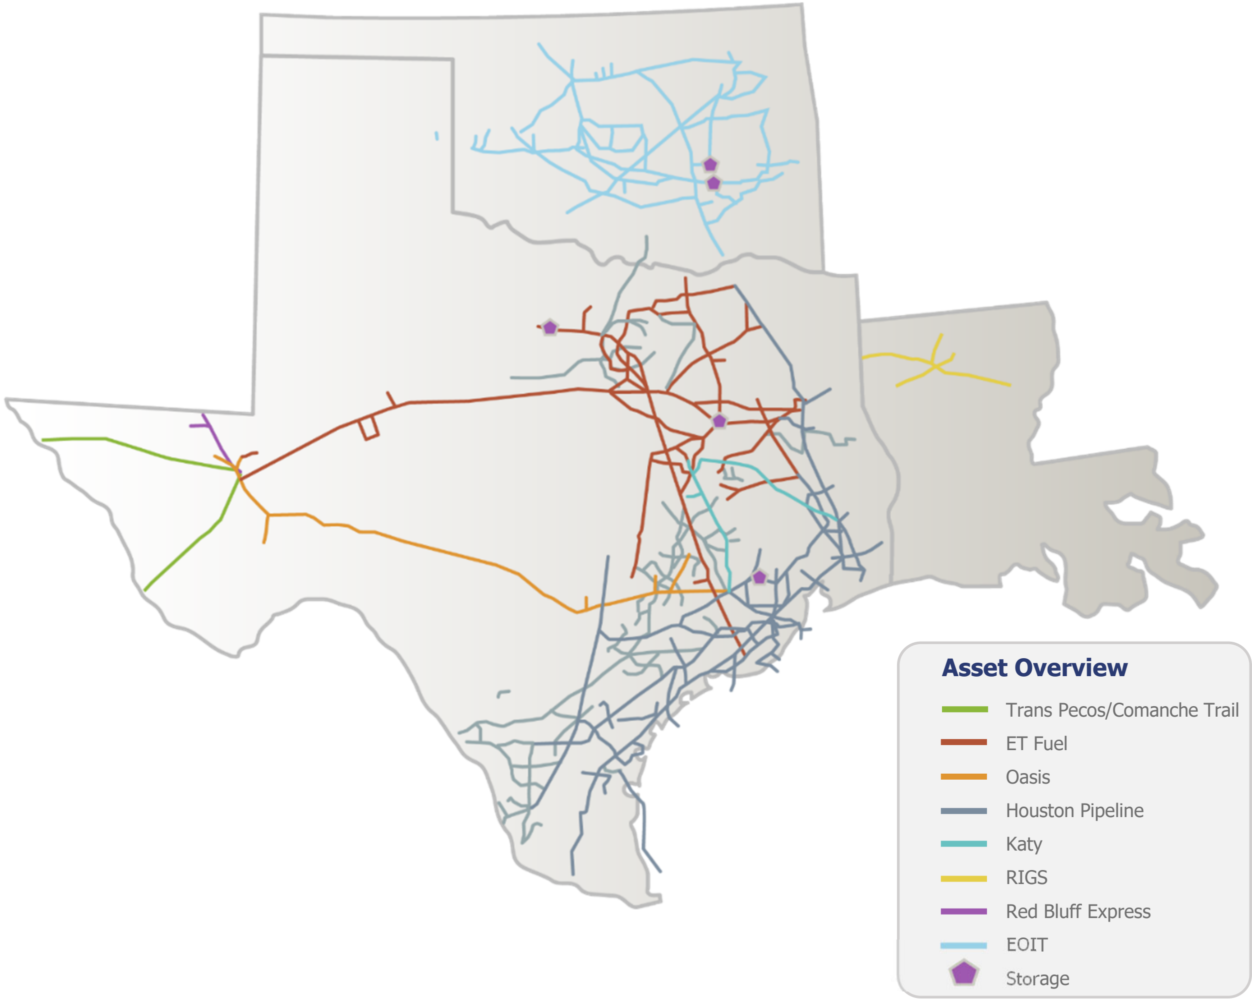
- ➢ Stability
  - Approximately 95 percent of revenue is derived from fixed reservation fees
- ➢ Diversity
  - Access to multiple shale plays, storage facilities and markets
- ➢ Growth Opportunities
  - Well-positioned to capitalize on changing supply and demand dynamics
- ➢ Gulf Run Pipeline Project
  - 42-inch interstate natural gas pipeline with 1.65 Bcf/d of capacity
  - Will provide natural gas transportation between the Haynesville Shale and Gulf Coast
  - Expected compete by end of 2022

~26,900 miles of interstate pipelines with ~31 Bcf/d of throughput capacity and ~147 Bcf/d of working storage capacity

	PEPL	TGC	TW	FGT	SR	FEP	Tiger	MEP	Rover	Stingray	EGT	MRT	SESH	Total
Miles of Pipeline	6,300	2,190	2,610	5,365	740	185	200	510	720	290	5,900	1,600	290	26,900
Capacity (Bcf/d)	2.8	0.9	2.1	3.7	2.0	2.0	2.4	1.8	3.4	0.4	6.2	1.7	1.1	30.5
Owned Storage (Bcf)	73.4	13.0	--	--	--	--	--	--	--	--	29.0	31.5	--	146.9
Ownership	100%	100%	100%	50%	100%	50%	100%	50%	32.6%	100%	100%	100%	50%	

Intrastate Natural Gas Pipeline Segment

~ 11,600 miles of intrastate pipelines with ~24 Bcf/d of throughput capacity, and ~88 Bcf/d of working storage capacity



Intrastate Highlights

- Well-positioned to capture additional revenues from anticipated changes in natural gas supply and demand in the next five years
- Strategically taken steps to lock-in additional volumes under fee-based, long-term contracts with third-party customers
- Modernization and optimization work on the Oasis Pipeline is underway, which will add an incremental 60,000 Mcf/d of capacity out of the Permian Basin by the end of 2022
- Evaluating Permian Basin takeaway project that would utilize Energy Transfer assets, along with a new build intrastate pipeline from the Midland Basin to Energy Transfer's extensive pipeline network south of Fort Worth, TX, to provide producers with firm capacity to premier markets along the Texas Gulf Coast, as well as throughout the U.S.

Pipeline	Capacity (Bcf/d)	Pipeline (Miles)	Storage (Bcf/d)	Bi-Directional	Major Connect Hubs
Trans Pecos & Comanche Trail Pipelines	2.5	335	NA	No	Waha Header, Mexico Border
ET Fuel Pipeline	5.2	3,150	11.2	Yes	Waha, Katy, Carthage
Oasis Pipeline	2.0	750	NA	Yes	Waha, Katy
Houston Pipeline System	5.3	3,920	52.5	No	HSC, Katy, Aqua Dulce
ETC Katy Pipeline	2.9	460	NA	No	Katy
RIGS	2.1	450	NA	No	Union Power, LA Tech
Red Bluff Express	1.4	108	NA	No	Waha
EOIT[1]	2.4	2,200	24.0	Yes	OG&E, PSO

1. *The EOIT pipeline system is has multidirectional flow capabilities between numerous receipt and delivery points, which limits our ability to determinate an overall system capacity. During the year-ended December 31, 2020, the peak daily throughput was 2.4 Bcf/d*

Non-GAAP Reconciliation

Definitions

Adjusted EBITDA and Distributable Cash Flow are non-GAAP financial measures used by industry analysts, investors, lenders and rating agencies to assess the financial performance and the operating results of Energy Transfer's fundamental business activities and should not be considered in isolation or as a substitute for net income, income from operations, cash flows from operating activities, or other GAAP measures. There are material limitations to using measures such as Adjusted EBITDA and Distributable Cash Flow, including the difficulty associated with using either as the sole measure to compare the results of one company to another, and the inability to analyze certain significant items that directly affect a company's net income or loss or cash flows. In addition, our calculations of Adjusted EBITDA and Distributable Cash Flow may not be consistent with similarly titled measures of other companies and should be viewed in conjunction with measurements that are computed in accordance with GAAP, such as segment margin, operating income, net income and cash flow from operating activities.

We define Adjusted EBITDA as total partnership earnings before interest, taxes, depreciation, depletion, amortization and other non-cash items, such as non-cash compensation expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt and other non-operating income or expense items. Inventory adjustments that are excluded from the calculation of Adjusted EBITDA represent only the changes in lower of cost or market reserves on inventory that is carried at last-in, first-out ("LIFO"). These amounts are unrealized valuation adjustments applied to Sunoco LP's fuel volumes remaining in inventory at the end of the period.

Adjusted EBITDA reflects amounts for less than wholly-owned subsidiaries based on 100% of the subsidiaries' results of operations. Adjusted EBITDA reflects amounts for unconsolidated affiliates based on the same recognition and measurement methods used to record equity in earnings of unconsolidated affiliates. Adjusted EBITDA related to unconsolidated affiliates excludes the same items with respect to the unconsolidated affiliate as those excluded from the calculation of Adjusted EBITDA, such as interest, taxes, depreciation, depletion, amortization and other non-cash items. Although these amounts are excluded from Adjusted EBITDA related to unconsolidated affiliates, such exclusion should not be understood to imply that we have control over the operations and resulting revenues and expenses of such affiliates. We do not control our unconsolidated affiliates; therefore, we do not control the earnings or cash flows of such affiliates.

Distributable Cash Flow is used by management to evaluate our overall performance. Our partnership agreement requires us to distribute all available cash, and Distributable Cash Flow is calculated to evaluate our ability to fund distributions through cash generated by our operations. We define Distributable Cash Flow as net income, adjusted for certain non-cash items, less distributions to preferred unitholders and maintenance capital expenditures. Non-cash items include depreciation, depletion and amortization, non-cash compensation expense, amortization included in interest expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt and deferred income taxes. For unconsolidated affiliates, Distributable Cash Flow reflects the Partnership's proportionate share of the investee's distributable cash flow.

On a consolidated basis, Distributable Cash Flow includes 100% of the Distributable Cash Flow of Energy Transfer's consolidated subsidiaries. However, to the extent that noncontrolling interests exist among the Partnership's subsidiaries, the Distributable Cash Flow generated by our subsidiaries may not be available to be distributed to our partners. In order to reflect the cash flows available for distributions to the partners of Energy Transfer, the Partnership has reported Distributable Cash Flow attributable to the partners of Energy Transfer, which is calculated by adjusting Distributable Cash Flow (consolidated), as follows:

- For subsidiaries with publicly traded equity interests, Distributable Cash Flow (consolidated) includes 100% of Distributable Cash Flow attributable to such subsidiary, and Distributable Cash Flow attributable to the our partners includes distributions to be received by the parent company with respect to the periods presented.
- For consolidated joint ventures or similar entities, where the noncontrolling interest is not publicly traded, Distributable Cash Flow (consolidated) includes 100% of Distributable Cash Flow attributable to such subsidiaries, but Distributable Cash Flow attributable to the partners reflects only the amount of Distributable Cash Flow of such subsidiaries that is attributable to our ownership interest.

For Distributable Cash Flow attributable to partners, as adjusted, certain transaction-related and non-recurring expenses that are included in net income are excluded.
